# Performance Profiles

## **Emergency Department**

District group 1 hospitals  
(C1) peer group

**October to December 2017**

## Armidale and New England Hospital: Emergency department (ED) overview

October to December 2017

All presentations:<sup>1</sup> 3,790 patients  
Emergency presentations:<sup>2</sup> 3,691 patients

| Same period last year | Change since one year ago |
|-----------------------|---------------------------|
| 4,074                 | -7.0%                     |
| 3,874                 | -4.7%                     |

## Armidale and New England Hospital: Time patients waited to start treatment<sup>3</sup>

October to December 2017

**Triage 2** Emergency (e.g. chest pain, severe burns): 255 patients

Median time to start treatment<sup>4</sup> 8 minutes  
90th percentile time to start treatment<sup>5</sup> 29 minutes

**Triage 3** Urgent (e.g. moderate blood loss, dehydration): 953 patients

Median time to start treatment<sup>4</sup> 23 minutes  
90th percentile time to start treatment<sup>5</sup> 69 minutes

**Triage 4** Semi-urgent (e.g. sprained ankle, earache): 2,166 patients

Median time to start treatment<sup>4</sup> 27 minutes  
90th percentile time to start treatment<sup>5</sup> 101 minutes

**Triage 5** Non-urgent (e.g. small cuts or abrasions): 306 patients

Median time to start treatment<sup>4</sup> 22 minutes  
90th percentile time to start treatment<sup>5</sup> 92 minutes

| Same period last year | NSW (this period) |
|-----------------------|-------------------|
| 236                   |                   |
| 8 minutes             | 8 minutes         |
| 31 minutes            | 23 minutes        |
| 1,130                 |                   |
| 26 minutes            | 20 minutes        |
| 88 minutes            | 65 minutes        |
| 2,220                 |                   |
| 38 minutes            | 26 minutes        |
| 154 minutes           | 99 minutes        |
| 276                   |                   |
| 20 minutes            | 23 minutes        |
| 106 minutes           | 103 minutes       |

## Armidale and New England Hospital: Time from presentation until leaving the ED

October to December 2017

Attendances used to calculate time to leaving the ED:<sup>6</sup> 3,790 patients

Percentage of patients who spent four hours or less in the ED 81.4%

| Same period last year | Change since one year ago |
|-----------------------|---------------------------|
| 4,074                 | -7.0%                     |
| 79.9%                 |                           |

\* Suppressed due to small number of patients and to protect privacy. Relevant graphs are also suppressed.

- All emergency and non-emergency attendances at the emergency department (ED).
- All attendances that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients waited equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients waited equal to or longer than this time.
- All presentations that have a departure time.

**Note:** Presentation time is the earlier time recorded for clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care relevant to the patient's presenting problems.

**Source:** Health Information Exchange, NSW Health (extracted 23 January 2018).

## Armidales and New England Hospital: Patients presenting to the emergency department October to December 2017

All presentations:<sup>1</sup> 3,790 patients

Emergency presentations<sup>2</sup> by triage category: 3,691 patients

|                         | Same period last year | Change since one year ago |
|-------------------------|-----------------------|---------------------------|
| All presentations       | 4,074                 | -7.0%                     |
| Emergency presentations | 3,874                 | -4.7%                     |
| Resuscitation           | 12                    | -8.3%                     |
| Emergency               | 236                   | 8.1%                      |
| Urgent                  | 1,130                 | -15.7%                    |
| Semi-urgent             | 2,220                 | -2.4%                     |
| Non-urgent              | 276                   | 10.9%                     |

| All emergency presentations | 3,411        | 3,720        | 3,563        | 3,656        | 3,714        | 3,884        | 3,874        | 3,691        |

## Armidales and New England Hospital: Patients arriving by ambulance October to December 2017

Arrivals used to calculate transfer of care time:<sup>7</sup> 395 patients \*\*

ED Transfer of care time

|  | Same period last year | Change since one year ago |
|--|-----------------------|---------------------------|
| Arrivals used to calculate transfer of care time | 565                   |                           |
| ED Transfer of care time                         | 4 minutes             | -2 minutes                |
| 90th percentile time                             | 27 minutes            | -2 minutes                |

(†) Data points are not shown in graphs for quarters when patient numbers are too small.

(‡) Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

(\*\*) Interpret with caution: total ambulance arrivals include more than 30% of records for which transfer of care time cannot be calculated.

## Armidale and New England Hospital: Time patients waited to start treatment, triage 2 October to December 2017

**Triage 2** Emergency (e.g. chest pain, severe burns)

Number of triage 2 patients: 255

Number of triage 2 patients used to calculate waiting time:<sup>3</sup> 253

Median time to start treatment<sup>4</sup>  8 minutes

90th percentile time to start treatment<sup>5</sup>  29 minutes

| Same period last year | NSW (this period) |
|-----------------------|-------------------|
| 236                   |                   |
| 227                   |                   |
| 8 minutes             | 8 minutes         |
| 31 minutes            | 23 minutes        |

### Percentage of triage 2 patients who received treatment by time, October to December 2017

| All presentations                                     | 24.7% | 49.0% | 68.5% | 81.4% | 94.3% | 97.9% | 98.8% | 99.3% |

(†) Data points are not shown in graphs for quarters when patient numbers are too small.

(‡) Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

## Armidale and New England Hospital: Time spent in the ED Percentage of patients who spent four hours or less in the ED October to December 2017

All presentations at the emergency department: <sup>1</sup> 3,790 patients

Presentations used to calculate time to leaving the ED: <sup>6</sup> 3,790 patients

Percentage of patients who spent four hours or less in the ED

|   | Same period last year | Change since one year ago |
|---|-----------------------|---------------------------|
| All presentations at the emergency department                 | 4,074                 | -7.0%                     |
| Presentations used to calculate time to leaving the ED        | 4,074                 | -7.0%                     |
| Percentage of patients who spent four hours or less in the ED | 79.9%                 |                           |

Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to December 2017 <sup>†‡</sup>

\* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.

† Data points are not shown in graphs for quarters when patient numbers were too small.

‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

**Note:** Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

**Note:** All percentages are rounded and therefore percentages may not add to 100%.

**Sources:** ED data from Health Information Exchange, NSW Health (extracted 23 January 2018). Transfer of care data from Transfer of Care Reporting System (extracted 23 January 2018).

## Bathurst Base Hospital: Emergency department (ED) overview

October to December 2017

All presentations:<sup>1</sup> 6,776 patients  
 Emergency presentations:<sup>2</sup> 6,690 patients

| Same period last year | Change since one year ago |
|-----------------------|---------------------------|
| 6,384                 | 6.1%                      |
| 6,324                 | 5.8%                      |

## Bathurst Base Hospital: Time patients waited to start treatment<sup>3</sup>

October to December 2017

**Triage 2** Emergency (e.g. chest pain, severe burns): 702 patients

Median time to start treatment<sup>4</sup> 7 minutes  
 90th percentile time to start treatment<sup>5</sup> 14 minutes

**Triage 3** Urgent (e.g. moderate blood loss, dehydration): 2,236 patients

Median time to start treatment<sup>4</sup> 19 minutes  
 90th percentile time to start treatment<sup>5</sup> 54 minutes

**Triage 4** Semi-urgent (e.g. sprained ankle, earache): 3,142 patients

Median time to start treatment<sup>4</sup> 18 minutes  
 90th percentile time to start treatment<sup>5</sup> 77 minutes

**Triage 5** Non-urgent (e.g. small cuts or abrasions): 576 patients

Median time to start treatment<sup>4</sup> 15 minutes  
 90th percentile time to start treatment<sup>5</sup> 79 minutes

| Same period last year | NSW (this period) |

**Bathurst Base Hospital: Time spent in the ED**  
 Percentage of patients who spent four hours or less in the ED  
 October to December 2017

All presentations at the emergency department: <sup>1</sup> 6,776 patients

Presentations used to calculate time to leaving the ED: <sup>6</sup> 6,774 patients

Percentage of patients who spent four hours or less in the ED

|   | Same period last year | Change since one year ago |
|---|-----------------------|---------------------------|
| All presentations at the emergency department                 | 6,384                 | 6.1%                      |
| Presentations used to calculate time to leaving the ED        | 6,384                 | 6.1%                      |
| Percentage of patients who spent four hours or less in the ED | 74.1%                 |                           |

Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to December 2017 <sup>†‡</sup>

\* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.

† Data points are not shown in graphs for quarters when patient numbers were too small.

‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

**Note:** Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

**Note:** All percentages are rounded and therefore percentages may not add to 100%.

**Sources:** ED data from Health Information Exchange, NSW Health (extracted 23 January 2018).  
 Transfer of care data from Transfer of Care Reporting System (extracted 23 January 2018).

## Belmont Hospital: Emergency department (ED) overview

October to December 2017

All presentations:<sup>1</sup> 6,300 patients  
Emergency presentations:<sup>2</sup> 6,274 patients

| Same period last year | Change since one year ago |
|-----------------------|---------------------------|
| 6,292                 | 0.1%                      |
| 6,256                 | 0.3%                      |

## Belmont Hospital: Time patients waited to start treatment<sup>3</sup>

October to December 2017

**Triage 2** Emergency (e.g. chest pain, severe burns): 492 patients

Median time to start treatment<sup>4</sup> 8 minutes  
90th percentile time to start treatment<sup>5</sup> 16 minutes

**Triage 3** Urgent (e.g. moderate blood loss, dehydration): 1,243 patients

Median time to start treatment<sup>4</sup> 17 minutes  
90th percentile time to start treatment<sup>5</sup> 41 minutes

**Triage 4** Semi-urgent (e.g. sprained ankle, earache): 3,027 patients

Median time to start treatment<sup>4</sup> 22 minutes  
90th percentile time to start treatment<sup>5</sup> 78 minutes

**Triage 5** Non-urgent (e.g. small cuts or abrasions): 1,499 patients

Median time to start treatment<sup>4</sup> 24 minutes  
90th percentile time to start treatment<sup>5</sup> 99 minutes

| Same period last year | NSW (this period) |
|-----------------------|-------------------|
| 509                   |                   |

**Belmont Hospital: Time spent in the ED**  
 Percentage of patients who spent four hours or less in the ED  
 October to December 2017

All presentations at the emergency department: <sup>1</sup> 6,300 patients

Presentations used to calculate time to leaving the ED: <sup>6</sup> 6,300 patients

Percentage of patients who spent four hours or less in the ED

|   | Same period last year | Change since one year ago |
|---|-----------------------|---------------------------|
| All presentations at the emergency department                 | 6,292                 | 0.1%                      |
| Presentations used to calculate time to leaving the ED        | 6,292                 | 0.1%                      |
| Percentage of patients who spent four hours or less in the ED | 82.4%                 |                           |

Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to December 2017 <sup>†‡</sup>

\* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.

† Data points are not shown in graphs for quarters when patient numbers were too small.

‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

**Note:** Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

**Note:** All percentages are rounded and therefore percentages may not add to 100%.

**Sources:** ED data from Health Information Exchange, NSW Health (extracted 23 January 2018). Transfer of care data from Transfer of Care Reporting System (extracted 23 January 2018).

## Bowral and District Hospital: Emergency department (ED) overview

October to December 2017

All presentations:<sup>1</sup> 5,066 patients  
 Emergency presentations:<sup>2</sup> 4,950 patients

| Same period last year | Change since one year ago |
|-----------------------|---------------------------|
| 5,133                 | -1.3%                     |
| 4,970                 | -0.4%                     |

## Bowral and District Hospital: Time patients waited to start treatment<sup>3</sup>

October to December 2017

**Triage 2** Emergency (e.g. chest pain, severe burns): 375 patients

Median time to start treatment<sup>4</sup>  10 minutes  
 90th percentile time to start treatment<sup>5</sup>  20 minutes

**Triage 3** Urgent (e.g. moderate blood loss, dehydration): 1,628 patients

Median time to start treatment<sup>4</sup>  23 minutes  
 90th percentile time to start treatment<sup>5</sup>  77 minutes

**Triage 4** Semi-urgent (e.g. sprained ankle, earache): 2,280 patients

Median time to start treatment<sup>4</sup>  28 minutes  
 90th percentile time to start treatment<sup>5</sup>  110 minutes

**Triage 5** Non-urgent (e.g. small cuts or abrasions): 653 patients

Median time to start treatment<sup>4</sup>  28 minutes  
 90th percentile time to start treatment<sup>5</sup>  117 minutes

| Same period last year | NSW (this period) |

**Bowral and District Hospital: Time spent in the ED**  
 Percentage of patients who spent four hours or less in the ED  
 October to December 2017

All presentations at the emergency department: <sup>1</sup> 5,066 patients

Presentations used to calculate time to leaving the ED: <sup>6</sup> 5,066 patients

Percentage of patients who spent four hours or less in the ED

|   | Same period last year | Change since one year ago |
|---|-----------------------|---------------------------|
| All presentations at the emergency department                 | 5,133                 | -1.3%                     |
| Presentations used to calculate time to leaving the ED        | 5,133                 | -1.3%                     |
| Percentage of patients who spent four hours or less in the ED | 85.6%                 |                           |

Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to December 2017 <sup>†‡</sup>

\* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.

† Data points are not shown in graphs for quarters when patient numbers were too small.

‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

**Note:** Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

**Note:** All percentages are rounded and therefore percentages may not add to 100%.

**Sources:** ED data from Health Information Exchange, NSW Health (extracted 23 January 2018). Transfer of care data from Transfer of Care Reporting System (extracted 23 January 2018).

## Broken Hill Base Hospital: Emergency department (ED) overview

October to December 2017

All presentations:<sup>1</sup> 5,629 patients  
 Emergency presentations:<sup>2</sup> 5,109 patients

| Same period last year | Change since one year ago |
|-----------------------|---------------------------|
| 5,845                 | -3.7%                     |
| 5,265                 | -3.0%                     |

## Broken Hill Base Hospital: Time patients waited to start treatment <sup>3</sup>

October to December 2017

**Triage 2** Emergency (e.g. chest pain, severe burns): 469 patients

Median time to start treatment<sup>4</sup> 8 minutes  
 90th percentile time to start treatment<sup>5</sup> 22 minutes

**Triage 3** Urgent (e.g. moderate blood loss, dehydration): 1,045 patients

Median time to start treatment<sup>4</sup> 15 minutes  
 90th percentile time to start treatment<sup>5</sup> 44 minutes

**Triage 4** Semi-urgent (e.g. sprained ankle, earache): 1,757 patients

Median time to start treatment<sup>4</sup> 19 minutes  
 90th percentile time to start treatment<sup>5</sup> 71 minutes

**Triage 5** Non-urgent (e.g. small cuts or abrasions): 1,816 patients

Median time to start treatment<sup>4</sup> 20 minutes  
 90th percentile time to start treatment<sup>5</sup> 85 minutes

**Broken Hill Base Hospital: Time spent in the ED**  
 Percentage of patients who spent four hours or less in the ED  
 October to December 2017

All presentations at the emergency department: <sup>1</sup> 5,629 patients

Presentations used to calculate time to leaving the ED: <sup>6</sup> 5,629 patients

Percentage of patients who spent four hours or less in the ED

|   | Same period last year | Change since one year ago |
|---|-----------------------|---------------------------|
| All presentations at the emergency department: <sup>1</sup> 5,629 patients          | 5,845                 | -3.7%                     |
| Presentations used to calculate time to leaving the ED: <sup>6</sup> 5,629 patients | 5,845                 | -3.7%                     |
| Percentage of patients who spent four hours or less in the ED                       | 89.9%                 |                           |

Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to December 2017 <sup>†‡</sup>

\* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.

† Data points are not shown in graphs for quarters when patient numbers were too small.

‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

**Note:** Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

**Note:** All percentages are rounded and therefore percentages may not add to 100%.

**Sources:** ED data from Health Information Exchange, NSW Health (extracted 23 January 2018). Transfer of care data from Transfer of Care Reporting System (extracted 23 January 2018).

## Goulburn Base Hospital: Emergency department (ED) overview

October to December 2017

All presentations:<sup>1</sup> 4,812 patients  
Emergency presentations:<sup>2</sup> 4,500 patients

| Same period last year | Change since one year ago |
|-----------------------|---------------------------|
| 4,660                 | 3.3%                      |
| 4,399                 | 2.3%                      |

## Goulburn Base Hospital: Time patients waited to start treatment<sup>3</sup>

October to December 2017

**Triage 2** Emergency (e.g. chest pain, severe burns): 533 patients

Median time to start treatment<sup>4</sup> 9 minutes  
90th percentile time to start treatment<sup>5</sup> 20 minutes

**Triage 3** Urgent (e.g. moderate blood loss, dehydration): 1,931 patients

Median time to start treatment<sup>4</sup> 22 minutes  
90th percentile time to start treatment<sup>5</sup> 82 minutes

**Triage 4** Semi-urgent (e.g. sprained ankle, earache): 1,715 patients

Median time to start treatment<sup>4</sup> 31 minutes  
90th percentile time to start treatment<sup>5</sup> 119 minutes

**Triage 5** Non-urgent (e.g. small cuts or abrasions): 294 patients

Median time to start treatment<sup>4</sup> 29 minutes  
90th percentile time to start treatment<sup>5</sup> 107 minutes

**Goulburn Base Hospital: Time spent in the ED**  
 Percentage of patients who spent four hours or less in the ED  
 October to December 2017

All presentations at the emergency department: <sup>1</sup> 4,812 patients  
 Presentations used to calculate time to leaving the ED: <sup>6</sup> 4,812 patients

Percentage of patients who spent four hours or less in the ED

|   | Same period last year | Change since one year ago |
|---|-----------------------|---------------------------|
| All presentations at the emergency department                 | 4,660                 | 3.3%                      |
| Presentations used to calculate time to leaving the ED        | 4,660                 | 3.3%                      |
| Percentage of patients who spent four hours or less in the ED | 80.4%                 |                           |

Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to December 2017 <sup>†‡</sup>

\* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.  
 † Data points are not shown in graphs for quarters when patient numbers were too small.  
 ‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

**Note:** Presentation time is the earlier of times recorded for the start of clerical registration or the triage process.  
 Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

**Note:** All percentages are rounded and therefore percentages may not add to 100%.

**Sources:** ED data from Health Information Exchange, NSW Health (extracted 23 January 2018).  
 Transfer of care data from Transfer of Care Reporting System (extracted 23 January 2018).

## Grafton Base Hospital: Emergency department (ED) overview

October to December 2017

All presentations:<sup>1</sup> 6,679 patients  
Emergency presentations:<sup>2</sup> 6,180 patients

| Same period last year | Change since one year ago |

Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to December 2017 <sup>†‡</sup>

\* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.  
 † Data points are not shown in graphs for quarters when patient numbers were too small.  
 ‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

**Note:** Presentation time is the earlier of times recorded for the start of clerical registration or the triage process.  
 Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

**Note:** All percentages are rounded and therefore percentages may not add to 100%.

**Sources:** ED data from Health Information Exchange, NSW Health (extracted 23 January 2018).  
 Transfer of care data from Transfer of Care Reporting System (extracted 23 January 2018).

## Griffith Base Hospital: Emergency department (ED) overview

October to December 2017

All presentations:<sup>1</sup> 5,087 patients  
 Emergency presentations:<sup>2</sup> 4,778 patients

| Same period last year | Change since one year ago |
|-----------------------|---------------------------|
| 5,425                 | -6.2%                     |
| 5,238                 | -8.8%                     |

## Griffith Base Hospital: Time patients waited to start treatment<sup>3</sup>

October to December 2017

**Triage 2** Emergency (e.g. chest pain, severe burns): 508 patients

Median time to start treatment<sup>4</sup> 6 minutes  
 90th percentile time to start treatment<sup>5</sup> 16 minutes

**Triage 3** Urgent (e.g. moderate blood loss, dehydration): 1,905 patients

Median time to start treatment<sup>4</sup> 14 minutes  
 90th percentile time to start treatment<sup>5</sup> 42 minutes

**Triage 4** Semi-urgent (e.g. sprained ankle, earache): 1,773 patients

Median time to start treatment<sup>4</sup> 16 minutes  
 90th percentile time to start treatment<sup>5</sup> 73 minutes

**Triage 5** Non-urgent (e.g. small cuts or abrasions): 559 patients

Median time to start treatment<sup>4</sup> 14 minutes  
 90th percentile time to start treatment<sup>5</sup> 68 minutes

## Griffith Base Hospital: Time from presentation until leaving the ED

October to December 2017

Attendances used to calculate time to leaving the ED:<sup>6</sup> 5,086 patients

Percentage of patients who spent four hours or less in the ED 80.5%

| Same period last year | Change since one year ago |
|-----------------------|---------------------------|
| 5,424                 | -6.2%                     |
| 82.3%                 |                           |

\* Suppressed due to small number of patients and to protect privacy. Relevant graphs are also suppressed.

- All emergency and non-emergency attendances at the emergency department (ED).
- All attendances that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients waited equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients waited equal to or longer than this time.
- All presentations that have a departure time.

**Note:** Presentation time is the earlier time recorded for clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care relevant to the patient's presenting problems.

**Source:** Health Information Exchange, NSW Health (extracted 23 January 2018).

## Griffith Base Hospital: Patients presenting to the emergency department October to December 2017

All presentations:<sup>1</sup> 5,087 patients

Emergency presentations<sup>2</sup> by triage category: 4,778 patients

|                         | Same period last year | Change since one year ago |
|-------------------------|-----------------------|---------------------------|
| All presentations       | 5,425                 | -6.2%                     |
| Emergency presentations | 5,238                 | -8.8%                     |
| 1 Resuscitation         | 32                    | 3.1%                      |
| 2 Emergency             | 443                   | 14.7%                     |

| All presentations at the emergency department                 | 5,425                 | -6.2%                     |
| Presentations used to calculate time to leaving the ED        | 5,424                 | -6.2%                     |
| Percentage of patients who spent four hours or less in the ED | 82.3%                 |                           |

Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to December 2017 <sup>†‡</sup>

\* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.

† Data points are not shown in graphs for quarters when patient numbers were too small.

‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

**Note:** Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

**Note:** All percentages are rounded and therefore percentages may not add to 100%.

**Sources:** ED data from Health Information Exchange, NSW Health (extracted 23 January 2018). Transfer of care data from Transfer of Care Reporting System (extracted 23 January 2018).

## Hawkesbury District Health Services: Emergency department (ED) overview

October to December 2017

All presentations:<sup>1</sup> 6,469 patients  
Emergency presentations:<sup>2</sup> 6,185 patients

| Same period last year | Change since one year ago |
|-----------------------|---------------------------|
| 6,173                 | 4.8%                      |
| 5,912                 | 4.6%                      |

## Hawkesbury District Health Services: Time patients waited to start treatment<sup>3</sup>

October to December 2017

**Triage 2** Emergency (e.g. chest pain, severe burns): 832 patients

Median time to start treatment<sup>4</sup> 11 minutes  
90th percentile time to start treatment<sup>5</sup> 26 minutes

**Triage 3** Urgent (e.g. moderate blood loss, dehydration): 1,723 patients

Median time to start treatment<sup>4</sup> 14 minutes  
90th percentile time to start treatment<sup>5</sup> 51 minutes

**Triage 4** Semi-urgent (e.g. sprained ankle, earache): 3,110 patients

Median time to start treatment<sup>4</sup> 13 minutes  
90th percentile time to start treatment<sup>5</sup> 65 minutes

**Triage 5** Non-urgent (e.g. small cuts or abrasions): 490 patients

Median time to start treatment<sup>4</sup> 12 minutes  
90th percentile time to start treatment<sup>5</sup> 55 minutes

## Hawkesbury District Health Services: Time spent in the ED

### Percentage of patients who spent four hours or less in the ED

October to December 2017

All presentations at the emergency department: <sup>1</sup> 6,469 patients

Presentations used to calculate time to leaving the ED: <sup>6</sup> 6,469 patients

Percentage of patients who spent four hours or less in the ED

|   | Same period last year | Change since one year ago |
|---|-----------------------|---------------------------|
| All presentations at the emergency department                 | 6,173                 | 4.8%                      |
| Presentations used to calculate time to leaving the ED        | 6,173                 | 4.8%                      |
| Percentage of patients who spent four hours or less in the ED | 77.8%                 |                           |

Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to December 2017 <sup>†‡</sup>

\* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.

† Data points are not shown in graphs for quarters when patient numbers were too small.

‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

**Note:** Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

**Note:** All percentages are rounded and therefore percentages may not add to 100%.

**Sources:** ED data from Health Information Exchange, NSW Health (extracted 23 January 2018). Transfer of care data from Transfer of Care Reporting System (extracted 23 January 2018).

## Mount Druitt Hospital: Emergency department (ED) overview

October to December 2017

All presentations:<sup>1</sup> 8,502 patients  
 Emergency presentations:<sup>2</sup> 8,416 patients

| Same period last year | Change since one year ago |
|-----------------------|---------------------------|
| 8,063                 | 5.4%                      |
| 7,937                 | 6.0%                      |

## Mount Druitt Hospital: Time patients waited to start treatment<sup>3</sup>

October to December 2017

**Triage 2** Emergency (e.g. chest pain, severe burns): 1,446 patients

Median time to start treatment<sup>4</sup>  8 minutes  
 90th percentile time to start treatment<sup>5</sup>  17 minutes

**Triage 3** Urgent (e.g. moderate blood loss, dehydration): 3,258 patients

Median time to start treatment<sup>4</sup>  21 minutes  
 90th percentile time to start treatment<sup>5</sup>  62 minutes

**Triage 4** Semi-urgent (e.g. sprained ankle, earache): 2,762 patients

Median time to start treatment<sup>4</sup>  27 minutes  
 90th percentile time to start treatment<sup>5</sup>  82 minutes

**Triage 5** Non-urgent (e.g. small cuts or abrasions): 907 patients

Median time to start treatment<sup>4</sup>  24 minutes  
 90th percentile time to start treatment<sup>5</sup>  86 minutes

| Same period last year | NSW (this period) |
|-----------------------|-------------------|
| 1,245                 |                   |
| 10 minutes            | 8 minutes         |
| 25 minutes            | 23 minutes        |
| 3,095                 |                   |
| 27 minutes            | 20 minutes        |
| 87 minutes            | 65 minutes        |
| 2,579                 |                   |
| 37 minutes            | 26 minutes        |
| 108 minutes           | 99 minutes        |
| 991                   |                   |
| 34 minutes            | 23 minutes        |
| 112 minutes           | 103 minutes       |

## Mount Druitt Hospital: Time from presentation until leaving the ED

October to December 2017

Attendances used to calculate time to leaving the ED:<sup>6</sup> 8,501 patients

Percentage of patients who spent four hours or less in the ED  80.0%

| Same period last year | Change since one year ago |
|-----------------------|---------------------------|
| 8,049                 | 5.6%                      |
| 71.9%                 |                           |

\* Suppressed due to small number of patients and to protect privacy. Relevant graphs are also suppressed.

- All emergency and non-emergency attendances at the emergency department (ED).
- All attendances that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients waited equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients waited equal to or longer than this time.
- All presentations that have a departure time.

**Note:** Presentation time is the earlier time recorded for clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care relevant to the patient's presenting problems.

## Mount Druitt Hospital: Time spent in the ED

### Percentage of patients who spent four hours or less in the ED

October to December 2017

All presentations at the emergency department: <sup>1</sup> 8,502 patients

Presentations used to calculate time to leaving the ED: <sup>6</sup> 8,501 patients

Percentage of patients who spent four hours or less in the ED

|   | Same period last year | Change since one year ago |
|---|-----------------------|---------------------------|
| All presentations at the emergency department                 | 8,063                 | 5.4%                      |
| Presentations used to calculate time to leaving the ED        | 8,049                 | 5.6%                      |
| Percentage of patients who spent four hours or less in the ED | 71.9%                 |                           |

Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to December 2017 <sup>†‡</sup>

\* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.

† Data points are not shown in graphs for quarters when patient numbers were too small.

‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

**Note:** Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

**Note:** All percentages are rounded and therefore percentages may not add to 100%.

**Sources:** ED data from Health Information Exchange, NSW Health (extracted 23 January 2018). Transfer of care data from Transfer of Care Reporting System (extracted 23 January 2018).

## Murwillumbah District Hospital: Emergency department (ED) overview

October to December 2017

All presentations:<sup>1</sup> 4,482 patients  
Emergency presentations:<sup>2</sup> 4,094 patients

| Same period last year | Change since one year ago |
|-----------------------|---------------------------|
| 4,564                 | -1.8%                     |
| 4,113                 | -0.5%                     |

## Murwillumbah District Hospital: Time patients waited to start treatment<sup>3</sup>

October to December 2017

**Triage 2** Emergency (e.g. chest pain, severe burns): 299 patients

Median time to start treatment<sup>4</sup> 6 minutes  
90th percentile time to start treatment<sup>5</sup> 14 minutes

**Triage 3** Urgent (e.g. moderate blood loss, dehydration): 1,236 patients

Median time to start treatment<sup>4</sup> 11 minutes  
90th percentile time to start treatment<sup>5</sup> 31 minutes

**Triage 4** Semi-urgent (e.g. sprained ankle, earache): 2,164 patients

Median time to start treatment<sup>4</sup> 12 minutes  
90th percentile time to start treatment<sup>5</sup> 50 minutes

**Triage 5** Non-urgent (e.g. small cuts or abrasions): 380 patients

Median time to start treatment<sup>4</sup> 12 minutes  
90th percentile time to start treatment<sup>5</sup> 56 minutes

| Same period last year | NSW (this period) |
|-----------------------|-------------------|
| 285                   |                   |

## Murwillumbah District Hospital: Patients arriving by ambulance October to December 2017

Arrivals used to calculate transfer of care time:<sup>7</sup> 187 patients \*\*

ED Transfer of care time

|  | Same period last year | Change since one year ago |
|--|-----------------------|---------------------------|
| Arrivals used to calculate transfer of care time | 189                   |                           |
| ED Transfer of care time                         |                       |                           |
| Median time                                      | 11 minutes            | -2 minutes                |
| 90th percentile time                             | 22 minutes            | -4 minutes                |

(†) Data points are not shown in graphs for quarters when patient numbers are too small.

(‡) Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

(\*\*) Interpret with caution: total ambulance arrivals include more than 30% of records for which transfer of care time cannot be calculated.

**Murwillumbah District Hospital: Time spent in the ED**  
 Percentage of patients who spent four hours or less in the ED  
 October to December 2017

All presentations at the emergency department: <sup>1</sup> 4,482 patients

Presentations used to calculate time to leaving the ED: <sup>6</sup> 4,480 patients

Percentage of patients who spent four hours or less in the ED

|   | Same period last year | Change since one year ago |
|---|-----------------------|---------------------------|
| All presentations at the emergency department                 | 4,564                 | -1.8%                     |
| Presentations used to calculate time to leaving the ED        | 4,563                 | -1.8%                     |
| Percentage of patients who spent four hours or less in the ED | 89.3%                 |                           |

Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to December 2017 <sup>†‡</sup>

\* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.

† Data points are not shown in graphs for quarters when patient numbers were too small.

‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

**Note:** Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

**Note:** All percentages are rounded and therefore percentages may not add to 100%.

**Sources:** ED data from Health Information Exchange, NSW Health (extracted 23 January 2018). Transfer of care data from Transfer of Care Reporting System (extracted 23 January 2018).

## Ryde Hospital: Emergency department (ED) overview

October to December 2017

All presentations:<sup>1</sup> 6,945 patients  
Emergency presentations:<sup>2</sup> 6,845 patients

| Same period last year | Change since one year ago |
|-----------------------|---------------------------|
| 6,758                 | 2.8%                      |
| 6,669                 | 2.6%                      |

## Ryde Hospital: Time patients waited to start treatment<sup>3</sup>

October to December 2017

**Triage 2** Emergency (e.g. chest pain, severe burns): 934 patients

Median time to start treatment<sup>4</sup> 7 minutes  
90th percentile time to start treatment<sup>5</sup> 13 minutes

**Triage 3** Urgent (e.g. moderate blood loss, dehydration): 2,536 patients

Median time to start treatment<sup>4</sup> 14 minutes  
90th percentile time to start treatment<sup>5</sup> 36 minutes

**Triage 4** Semi-urgent (e.g. sprained ankle, earache): 2,834 patients

Median time to start treatment<sup>4</sup> 14 minutes  
90th percentile time to start treatment<sup>5</sup> 61 minutes

**Triage 5** Non-urgent (e.g. small cuts or abrasions): 506 patients

Median time to start treatment<sup>4</sup> 18 minutes  
90th percentile time to start treatment<sup>5</sup> 95 minutes

## Ryde Hospital: Time spent in the ED

### Percentage of patients who spent four hours or less in the ED

October to December 2017

All presentations at the emergency department: <sup>1</sup> 6,945 patients

Presentations used to calculate time to leaving the ED: <sup>6</sup> 6,945 patients

Percentage of patients who spent four hours or less in the ED

|   | Same period last year | Change since one year ago |
|---|-----------------------|---------------------------|
| All presentations at the emergency department: <sup>1</sup> 6,945 patients          | 6,758                 | 2.8%                      |
| Presentations used to calculate time to leaving the ED: <sup>6</sup> 6,945 patients | 6,758                 | 2.8%                      |
| Percentage of patients who spent four hours or less in the ED                       | 83.8%                 |                           |

### Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to December 2017 <sup>†‡</sup>

\* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.

† Data points are not shown in graphs for quarters when patient numbers were too small.

‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

**Note:** Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

**Note:** All percentages are rounded and therefore percentages may not add to 100%.

**Sources:** ED data from Health Information Exchange, NSW Health (extracted 23 January 2018).  
Transfer of care data from Transfer of Care Reporting System (extracted 23 January 2018).

## Shellharbour Hospital: Emergency department (ED) overview

October to December 2017

All presentations:<sup>1</sup> 8,089 patients  
 Emergency presentations:<sup>2</sup> 7,839 patients

| Same period last year | Change since one year ago |
|-----------------------|---------------------------|
| 7,658                 | 5.6%                      |
| 7,420                 | 5.6%                      |

## Shellharbour Hospital: Time patients waited to start treatment<sup>3</sup>

October to December 2017

**Triage 2** Emergency (e.g. chest pain, severe burns): 796 patients

Median time to start treatment<sup>4</sup>  7 minutes  
 90th percentile time to start treatment<sup>5</sup>  15 minutes

**Triage 3** Urgent (e.g. moderate blood loss, dehydration): 2,850 patients

Median time to start treatment<sup>4</sup>  23 minutes  
 90th percentile time to start treatment<sup>5</sup>  99 minutes

**Triage 4** Semi-urgent (e.g. sprained ankle, earache): 3,900 patients

Median time to start treatment<sup>4</sup>  26 minutes  
 90th percentile time to start treatment<sup>5</sup>  139 minutes

**Triage 5** Non-urgent (e.g. small cuts or abrasions): 270 patients

Median time to start treatment<sup>4</sup>  29 minutes  
 90th percentile time to start treatment<sup>5</sup>  122 minutes

| Same period last year | NSW (this period) |

## Shellharbour Hospital: Patients arriving by ambulance October to December 2017

Arrivals used to calculate transfer of care time:<sup>7</sup> 1,669 patients

ED Transfer of care time

|  | Same period last year | Change since one year ago |
|--|-----------------------|---------------------------|
| Arrivals used to calculate transfer of care time | 1,606                 |                           |
| ED Transfer of care time                         |                       |                           |
| Median time                                      | 10 minutes            | 1 minute                  |
| 90th percentile time                             | 22 minutes            | 3 minutes                 |

(†) Data points are not shown in graphs for quarters when patient numbers are too small.

(‡) Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

## Shellharbour Hospital: Time patients waited to start treatment, triage 2 October to December 2017

**Triage 2** Emergency (e.g. chest pain, severe burns)

Number of triage 2 patients: 796

Number of triage 2 patients used to calculate waiting time:<sup>3</sup> 794

Median time to start treatment<sup>4</sup>  7 minutes

90th percentile time to start treatment<sup>5</sup>  15 minutes

| Same period last year | NSW (this period) |
|-----------------------|-------------------|
| 798                   | 796               |
| 7 minutes             | 8 minutes         |
| 13 minutes            | 23 minutes        |

**Shellharbour Hospital: Time spent in the ED**  
 Percentage of patients who spent four hours or less in the ED  
 October to December 2017

All presentations at the emergency department: <sup>1</sup> 8,089 patients

Presentations used to calculate time to leaving the ED: <sup>6</sup> 8,089 patients

Percentage of patients who spent four hours or less in the ED

|   | Same period last year | Change since one year ago |
|---|-----------------------|---------------------------|
| All presentations at the emergency department: <sup>1</sup> 8,089 patients          | 7,658                 | 5.6%                      |
| Presentations used to calculate time to leaving the ED: <sup>6</sup> 8,089 patients | 7,657                 | 5.6%                      |
| Percentage of patients who spent four hours or less in the ED                       | 67.6%                 |                           |

Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to December 2017 <sup>†‡</sup>

\* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.

† Data points are not shown in graphs for quarters when patient numbers were too small.

‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

**Note:** Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

**Note:** All percentages are rounded and therefore percentages may not add to 100%.

**Sources:** ED data from Health Information Exchange, NSW Health (extracted 23 January 2018).  
 Transfer of care data from Transfer of Care Reporting System (extracted 23 January 2018).

## South East Regional Hospital: Emergency department (ED) overview

October to December 2017

All presentations:<sup>1</sup> 4,626 patients  
 Emergency presentations:<sup>2</sup> 4,401 patients

| Same period last year | Change since one year ago |
|-----------------------|---------------------------|
| 4,440                 | 4.2%                      |
| 4,137                 | 6.4%                      |

## South East Regional Hospital: Time patients waited to start treatment<sup>3</sup>

October to December 2017

**Triage 2** Emergency (e.g. chest pain, severe burns): 479 patients

Median time to start treatment<sup>4</sup> 8 minutes  
 90th percentile time to start treatment<sup>5</sup> 19 minutes

**Triage 3** Urgent (e.g. moderate blood loss, dehydration): 1,450 patients

Median time to start treatment<sup>4</sup> 19 minutes  
 90th percentile time to start treatment<sup>5</sup> 57 minutes

**Triage 4** Semi-urgent (e.g. sprained ankle, earache): 1,879 patients

Median time to start treatment<sup>4</sup> 29 minutes  
 90th percentile time to start treatment<sup>5</sup> 123 minutes

**Triage 5** Non-urgent (e.g. small cuts or abrasions): 572 patients

Median time to start treatment<sup>4</sup> 30 minutes  
 90th percentile time to start treatment<sup>5</sup> 135 minutes

## South East Regional Hospital: Time from presentation until leaving the ED

October to December 2017

Attendances used to calculate time to leaving the ED:<sup>6</sup> 4,626 patients

Percentage of patients who spent four hours or less in the ED 72.9%

| Same period last year | Change since one year ago |
|-----------------------|---------------------------|
| 4,439                 | 4.2%                      |
| 72.3%                 |                           |

\* Suppressed due to small number of patients and to protect privacy. Relevant graphs are also suppressed.

- All emergency and non-emergency attendances at the emergency department (ED).
- All attendances that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients waited equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients waited equal to or longer than this time.
- All presentations that have a departure time.

**Note:** Presentation time is the earlier time recorded for clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care relevant to the patient's presenting problems.

**Source:** Health Information Exchange, NSW Health (extracted 23 January 2018).

## South East Regional Hospital: Patients presenting to the emergency department October to December 2017

All presentations:<sup>1</sup> 4,626 patients

Emergency presentations<sup>2</sup> by triage category: 4,401 patients

Emergency presentations<sup>2</sup> by quarter, January 2010 to December 2017 <sup>‡ §</sup>

|                             | Oct-Dec 2010 | Oct-Dec 2011 | Oct-Dec 2012 | Oct-Dec 2013 | Oct-Dec 2014 | Oct-Dec 2015 | Oct-Dec 2016 | Oct-Dec 2017 |

## South East Regional Hospital: Patients arriving by ambulance October to December 2017

Arrivals used to calculate transfer of care time:<sup>7</sup> 987 patients

ED Transfer of care time

Comparisons should be made with caution – South East Regional Hospital replaced Bega District Hospital, which provided different services.

- (†) Data points are not shown in graphs for quarters when patient numbers are too small.
- (‡) Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.
- (§) Quarterly information for this hospital is shown where data are available from the Health Information Exchange, NSW Health. For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

## South East Regional Hospital: Time patients waited to start treatment, triage 2 October to December 2017

**Triage 2** Emergency (e.g. chest pain, severe burns)

Number of triage 2 patients: 479

Number of triage 2 patients used to calculate waiting time:<sup>3</sup> 478

Median time to start treatment<sup>4</sup>  8 minutes

90th percentile time to start treatment<sup>5</sup>  19 minutes

| Same period last year | NSW (this period) |
|-----------------------|-------------------|
| 414                   |                   |
| 410                   |                   |
| 7 minutes             | 8 minutes         |
| 21 minutes            | 23 minutes        |

Percentage of triage 2 patients who received treatment by time, October to December 2017

For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.  
 § Quarterly information for this hospital is shown where data are available from the Health Information Exchange, NSW Health. For more information, see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

**Note:** Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

**Note:** All percentages are rounded and therefore percentages may not add to 100%.

**Sources:** ED data from Health Information Exchange, NSW Health (extracted 23 January 2018).  
 Transfer of care data from Transfer of Care Reporting System (extracted 23 January 2018).
