

Bowral and District Hospital: Emergency department (ED) overview

October to December 2018

All presentations:¹ 5,043 patients
 Emergency presentations:² 4,944 patients

Same period last year	Change since one year ago
5,067	0%
4,951	0%

Bowral and District Hospital: Time patients waited to start treatment³

October to December 2018

Triage 2 Emergency (e.g. chest pain, severe burns): 440 patients

Median time to start treatment⁴ 11 minutes
 90th percentile time to start treatment⁵ 30 minutes

Triage 3 Urgent (e.g. moderate blood loss, dehydration): 1,751 patients

Median time to start treatment⁴ 22 minutes
 90th percentile time to start treatment⁵ 62 minutes

Triage 4 Semi-urgent (e.g. sprained ankle, earache): 2,192 patients

Median time to start treatment⁴ 27 minutes
 90th percentile time to start treatment⁵ 111 minutes

Triage 5 Non-urgent (e.g. small cuts or abrasions): 536 patients

Median time to start treatment⁴ 25 minutes
 90th percentile time to start treatment⁵ 136 minutes

Bowral and District Hospital: Time from presentation until leaving the ED

October to December 2018

Attendances used to calculate time to leaving the ED:⁶ 5,043 patients

Percentage of patients who spent four hours or less in the ED 76%

Same period last year	Change since one year ago
5,067	0%
79%	

* Suppressed due to small number of patients and to protect privacy. Relevant graphs are also suppressed.

- All emergency and non-emergency attendances at the emergency department (ED).
- All attendances that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: October to December 2018*.
- The median is the time by which half of patients started treatment. The other half of patients waited equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients waited equal to or longer than this time.
- All presentations that have a departure time.

Note: Presentation time is the earlier time recorded for clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care relevant to the patient's presenting problems.

Bowral and District Hospital: Time spent in the ED
 Percentage of patients who spent four hours or less in the ED
 October to December 2018

All presentations at the emergency department: ¹ 5,043 patients

Presentations used to calculate time to leaving the ED: ⁶ 5,043 patients

Percentage of patients who spent four hours or less in the ED

	Same period last year	Change since one year ago
All presentations at the emergency department	5,067	0%
Presentations used to calculate time to leaving the ED	5,067	0%
Percentage of patients who spent four hours or less in the ED	78.9%	

Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to December 2018 ^{†‡}

* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.

† Data points are not shown in graphs for quarters when patient numbers were too small.

‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: October to December 2018*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

Note: Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

Note: All percentages are rounded and therefore percentages may not add to 100%.
