

Deniliquin Health Service: Emergency department (ED) overview

October to December 2017

All presentations:¹ 2,359 patients
 Emergency presentations:² 1,965 patients

Same period last year	Change since one year ago
2,699	-12.6%
2,009	-2.2%

Deniliquin Health Service: Time patients waited to start treatment³

October to December 2017

Triage 2 Emergency (e.g. chest pain, severe burns): 103 patients

Median time to start treatment⁴ 4 minutes

90th percentile time to start treatment⁵ *

Triage 3 Urgent (e.g. moderate blood loss, dehydration): 692 patients

Median time to start treatment⁴ 9 minutes

90th percentile time to start treatment⁵ 26 minutes

Triage 4 Semi-urgent (e.g. sprained ankle, earache): 814 patients

Median time to start treatment⁴ 8 minutes

90th percentile time to start treatment⁵ 31 minutes

Triage 5 Non-urgent (e.g. small cuts or abrasions): 356 patients

Median time to start treatment⁴ 8 minutes

90th percentile time to start treatment⁵ 37 minutes

Same period last year	NSW (this period)

Deniliquin Health Service: Time from presentation until leaving the ED

October to December 2017

Attendances used to calculate time to leaving the ED:⁶ 2,358 patients

Percentage of patients who spent four hours or less in the ED 89.0%

Same period last year	Change since one year ago
2,699	-12.6%
91.6%	

* Suppressed due to small number of patients and to protect privacy. Relevant graphs are also suppressed.

- All emergency and non-emergency attendances at the emergency department (ED).
- All attendances that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients waited equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients waited equal to or longer than this time.
- All presentations that have a departure time.

Note: Presentation time is the earlier time recorded for clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care relevant to the patient's presenting problems.

Deniliquin Health Service: Patients arriving by ambulance October to December 2017

Arrivals used to calculate transfer of care time:⁷ 108 patients ^{**}

ED Transfer of care time

	Same period last year	Change since one year ago
Arrivals used to calculate transfer of care time	136	
Median time	8 minutes	0 minutes
90th percentile time	31 minutes	-9 minutes

(†) Data points are not shown in graphs for quarters when patient numbers are too small.

(‡) Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

(§) Quarterly information for this hospital is shown where data are available from the Health Information Exchange, NSW Health. For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

(**) Interpret with caution: total ambulance arrivals include more than 30% of records for which transfer of care time cannot be calculated.

Deniliquin Health Service: Time spent in the ED

Percentage of patients who spent four hours or less in the ED

October to December 2017

All presentations at the emergency department: ¹ 2,359 patients

Presentations used to calculate time to leaving the ED: ⁶ 2,358 patients

Percentage of patients who spent four hours or less in the ED

	Same period last year	Change since one year ago
All presentations at the emergency department: ¹ 2,359 patients	2,699	-12.6%
Presentations used to calculate time to leaving the ED: ⁶ 2,358 patients	2,699	-12.6%
Percentage of patients who spent four hours or less in the ED	91.6%	

Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to December 2017 ^{†‡§}

* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.

† Data points are not shown in graphs for quarters when patient numbers were too small.

‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

§ Quarterly information for this hospital is shown where data are available from the Health Information Exchange, NSW Health. For more information, see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

Note: Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

Note: All percentages are rounded and therefore percentages may not add to 100%.

Sources: ED data from Health Information Exchange, NSW Health (extracted 23 January 2018).
Transfer of care data from Transfer of Care Reporting System (extracted 23 January 2018).
