October to December 2017

Sydney Children's Hospital: Emergency department (ED) overview

October to December 2017

All presentations:¹ 9,099 patients
Emergency presentations:² 9,016 patients

Same period last year	Change since one year ago
9,048	0.6%
8,940	0.9%

Sydney Children's Hospital: Time patients waited to start treatment³

October to December 2017

Triage 2 Emergency (e.g. chest pain, severe burns): 443 patients

Median time to start treatment⁴ 8 minutes
90th percentile time to start treatment⁵ 22 minutes

Triage 3 Urgent (e.g. moderate blood loss, dehydration): 1,752 patients

Median time to start treatment⁴ 21 minutes
90th percentile time to start treatment⁵ 51 minutes

Triage 4 Semi-urgent (e.g. sprained ankle, earache): 6,613 patients

Median time to start treatment⁴ 41 minutes
90th percentile time to start treatment⁵ 128 minutes

Triage 5 Non-urgent (e.g. small cuts or abrasions): 157 patients

Median time to start treatment⁴ 42 minutes
90th percentile time to start treatment⁵ 137 minutes

Same period last year	NSW (this period)
347	
8 minutes	8 minutes
21 minutes	23 minutes

38 minutes	23 minutes
111 minutes	103 minutes

Sydney Children's Hospital: Time from presentation until leaving the ED

October to December 2017

Attendances used to calculate time to leaving the ED:⁶ 9,099 patients

Percentage of patients who spent four hours or less in the ED 74.7%

Same period last year	Change since one year ago
9,047	0.6%
78.5%	

* Suppressed due to small number of patients and to protect privacy. Relevant graphs are also suppressed.

- All emergency and non-emergency attendances at the emergency department (ED).
- All attendances that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients waited equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients waited equal to or longer than this time.
- All presentations that have a departure time.

Note: Presentation time is the earlier time recorded for clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care relevant to the patient's presenting problems.

(‡) Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

Sydney Children's Hospital: Time spent in the ED
 Percentage of patients who spent four hours or less in the ED
 October to December 2017

All presentations at the emergency department: ¹ 9,099 patients

Presentations used to calculate time to leaving the ED: ⁶ 9,099 patients

Percentage of patients who spent four hours or less in the ED

	Same period last year	Change since one year ago
All presentations at the emergency department	9,048	0.6%
Presentations used to calculate time to leaving the ED	9,047	0.6%
Percentage of patients who spent four hours or less in the ED	78.5%	

Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to December 2017 ^{†‡}

* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.

† Data points are not shown in graphs for quarters when patient numbers were too small.

‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

Note: Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

Note: All percentages are rounded and therefore percentages may not add to 100%.

(‡) Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

(§) This hospital does not use one of the two major information systems implemented in NSW emergency departments. Caution is advised when comparing results from this emergency department to others. For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

The Children's Hospital at Westmead: Time patients waited to start treatment, triage 5 October to December 2017

Triage 5 Non-urgent (e.g. small cuts or abrasions)

Number of triage 5 patients: 69

Number of triage 5 patients used to calculate waiting time:³ 57

Median time to start treatment⁴ 56 minutes

90th percentile time to start treatment⁵ *

Same period last year	NSW (this period)
101	90
69 minutes	23 minutes
*	103 minutes

Percentage of triage 5 patients who received treatment by time, October to December 2017

Time patients waited to start treatment (minutes) for triage 5 patients, January 2010 to December 2017^{†‡§}

	Oct-Dec 2010	Oct-Dec 2011	Oct-Dec 2012	Oct-Dec 2013	Oct-Dec 2014	Oct-Dec 2015	Oct-Dec 2016	Oct-Dec 2017
Median time to start treatment ⁴ (minutes)	45	39	85	52	53	52	69	56
90th percentile time to start treatment ⁵ (minutes)	195	171	*	164	143	*	*	*

(†) Data points are not shown in graphs for quarters when patient numbers are too small.

(‡) Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

The Children's Hospital at Westmead: Time patients spent in the ED

By mode of separation

October to December 2017

All presentations:¹ 14,569 patients

Presentations used to calculate time to leaving the ED:⁶ 14,569 patients

Treated and discharged	9,857 (67.7%)
Treated and admitted to hospital	3,407 (23.4%)
Patient left without, or before completing, treatment	1,278 (8.8%)
Transferred to another hospital	27 (0.2%)
Other	0 (0%)

Same period last year	Change since one year ago
14,210	2.5%
9,204	7.1%
3,632	-6.2%
1,343	-4.8%
30	-10.0%
1	-100.0%

Percentage of patients who left the ED by time and mode of separation, October to December 2017^{†‡§}

1 hour 2 hours 3 hours 4 hours 6 hours 8 hours 10 hours 12 hours

	1 hour	2 hours	3 hours	4 hours	6 hours	8 hours	10 hours	12 hours
Treated and discharged	10.2%	36.8%	60.6%	77.7%	92.8%	97.1%	98.6%	99.2%
Treated and admitted to hospital	1.5%	9.5%	26.3%	44.1%	69.1%	82.6%	89.3%	92.9%
Patient left without, or before completing, treatment	41.1%	69.9%	84.0%	92.0%	98.3%	99.5%	99.8%	99.8%
Transferred to another hospital	25.9%	33.3%	48.1%	63.0%	74.1%	85.2%	92.6%	96.3%
All presentations	10.9%	33.4%	54.6%	71.1%	87.7%	93.9%	96.5%	97.8%

(‡) Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

(§) This hospital does not use one of the two major information systems implemented in NSW emergency departments. Caution is advised when comparing results from this emergency department to others. For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

The Children's Hospital at Westmead: Time spent in the ED Percentage of patients who spent four hours or less in the ED October to December 2017

All presentations at the emergency department: ¹ 14,569 patients

Presentations used to calculate time to leaving the ED: ⁶ 14,569 patients

Percentage of patients who spent four hours or less in the ED

	Same period last year	Change since one year ago
All presentations at the emergency department	14,210	2.5%
Presentations used to calculate time to leaving the ED	14,210	2.5%
Percentage of patients who spent four hours or less in the ED	72.4%	

Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to December 2017 ^{†‡}

* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.

† Data points are not shown in graphs for quarters when patient numbers were too small.

‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

Note: Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

Note: All percentages are rounded and therefore percentages may not add to 100%.

Sources: ED data from Health Information Exchange, NSW Health (extracted 23 January 2018).
Transfer of care data from Transfer of Care Reporting System (extracted 23 January 2018).
