Mental health services in NSW public facilities

Volume 2, Community Mental Health  
February 2010 and February 2011

Performance Profile:  
Nepean Blue Mountains Local Health District

# Introduction

The Bureau of Health Information has produced a Performance Profile for each Local Health District (LHD) and facility group included in its report *Patient Perspectives: Mental health services in NSW public facilities, Volume 2, Community Mental Health*.

This profile report offers a detailed snapshot of the performance of Nepean Blue Mountains LHD community mental health services. It is based upon 158 responses to the *NSW Health Patient Survey*, made by people accessing services in February 2010 and February 2011.

The profile builds on the main report, providing another layer of detail about local performance of Nepean Blue Mountains LHD. This profile includes survey results for:

- aspects of care scores relative to other facilities and NSW average
- the three highest and lowest ranking questions
- overall ratings of care
- demographic information about respondents.

The main report contains information on a state level, including:

- An overall account of how community mental health services are perceived and rated by users of the services
- How the ratings and perceptions about community mental health services differ from those given by other patient groups
- The extent of variation in ratings and perceptions within the state at regional and local level
- The highest rated aspect of care for community mental health services
- The lowest rated aspect of care for community mental health services
- Differences between population subgroups, for example whether perceptions and ratings of care differ between Aboriginal and non-Aboriginal people
- A comparison with other jurisdictions undertaking similar surveys to place NSW results in a broader context.

The main report and the associated *Patient Perspectives Technical Supplement: Mental health services in NSW public facilities, February 2010 and February 2011* are available at [www.bhi.nsw.gov.au](http://www.bhi.nsw.gov.au)

# Nepean Blue Mountains LHD: performance profile NSW Community Mental Health Survey

Survey questions were grouped into themed categories, called aspects of care and allocated a score. These scores were used to directly compare relative performance.

Within each aspect of care, those LHDs positioned towards the top of the range are performing well relative to other LHDs. Those located at the bottom are doing less well.

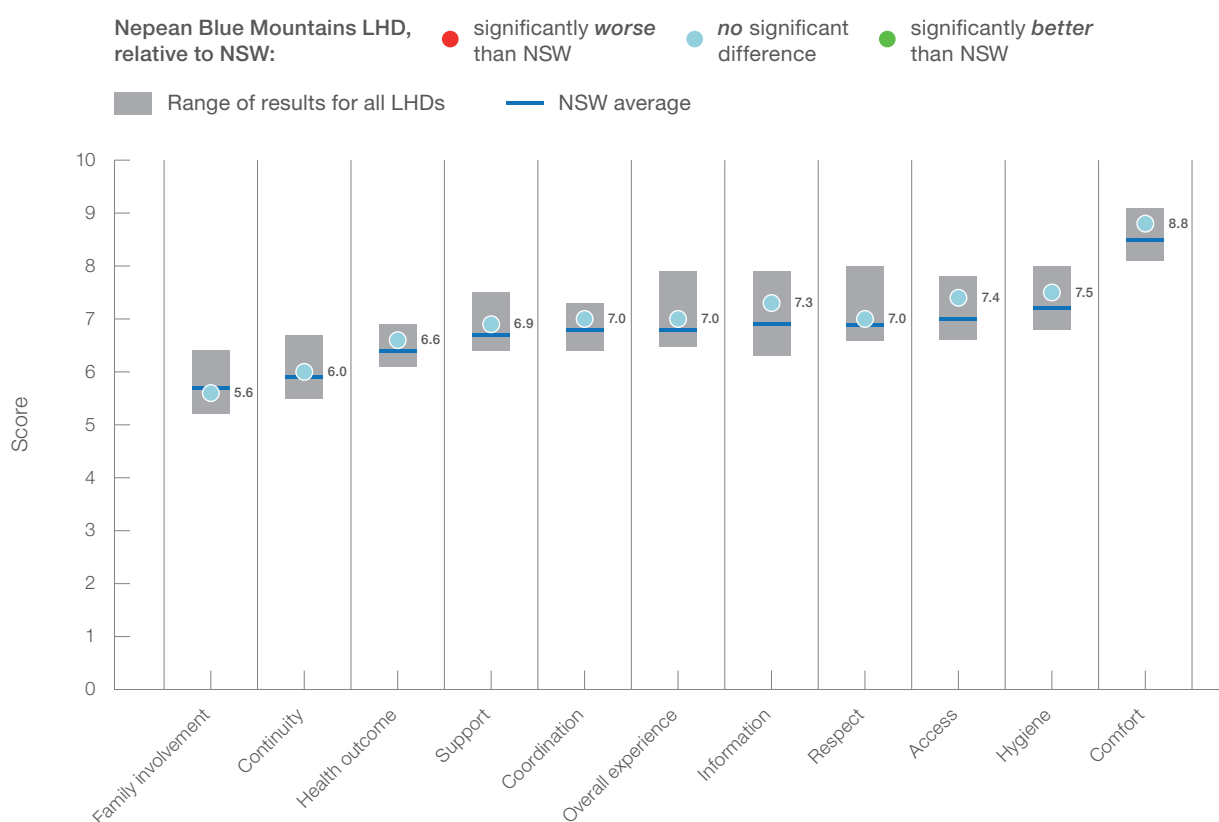

This graph shows for each aspect of care:

- scores for Nepean Blue Mountains LHD (shown as a dot)
- state average (shown as a blue line) and,
- the range of scores achieved across all NSW LHDs (shown as a grey block).

The graph also illustrates results of significance testing for Nepean Blue Mountains LHD compared to the NSW average.

As a guide, green dots indicate results that are significantly higher than the state average, while red dots represent a LHD is significantly lower than NSW.

Figure 1: **Nepean Blue Mountains LHD** Aspects of care scores relative to other LHDs and NSW average

Note: Results for facility groups with a response rate of <20%, are suppressed. For fuller definition and description of aspects of care, see *Patient Perspectives: Mental health services in NSW public facilities, Volume 2, Community Mental Health*.

**Nepean Blue Mountains LHD: What patients rated most positively about these outpatient services**<sup>1</sup>  
NSW Health Patient Survey, February 2010 and 2011

HIGHEST: If you attended a clinic, was the area where you met with staff clean and comfortable?

SECOND HIGHEST: Did the healthcare professional treat you with respect and dignity?

THIRD HIGHEST: Did the healthcare professional explain what to do if problems or symptoms continued, got worse, or came back?

**Nepean Blue Mountains LHD: What patients rated most negatively about these outpatient services**<sup>1</sup>  
NSW Health Patient Survey, February 2010 and 2011

LOWEST: Did you feel you could refuse a specific type of medicine or treatment?\*

SECOND LOWEST: Did someone tell you about medication side effects to watch for?

THIRD LOWEST: Did anyone talk to you about whether to include your family or friends in your counselling or treatment?

## Nepean Blue Mountains LHD: Characteristics of patients who completed the survey

NSW Health Patient Survey, February 2010 and 2011

Characteristic	Sub-group	This LHD	NSW
Age group	Under 20 years	11%	12%
	20 to 59 years	78%	74%
	60 years and over	11%	14%
Days spent in bed due to illness in last month	None	53%	53%
	One day	10%	7%
	Two days	7%	7%
	Three days	6%	6%
	Four days	5%	5%
	Five-to-seven days	8%	7%
	Eight-to-ten days	5%	4%
	More than ten days	6%	12%
Stayed in hospital in last 6 months	No	68%	72%
	Yes, only one time	21%	17%
	Yes, more than one time	12%	11%
Self-rated mental health status	Poor / Fair	43%	45%
	Good	32%	30%
	Very Good / Excellent	24%	25%

(\*) Up to half of mental health acute inpatients are involuntary admissions. It is not always appropriate to allow treatment refusal.

1. Based upon a scale which incorporates all response options. See the *Technical Supplement* available at [www.bhi.nsw.gov.au](http://www.bhi.nsw.gov.au)
2. Data weighted by age to reflect the population of all attendees during February 2010 and February 2011.
3. Standardised for age, self-reported health status, number of hospital stays, days bedridden with illness / injury in prior month.
4. Patient ratings for factors most associated with overall ratings are based on analysis of all respondents to the *Community Mental Health* module of the *NSW Health Patient Survey, 2010 and 2011* excluding those who did not rate their overall care.

Note: All percentages rounded to whole numbers and therefore percentages may not add to 100%.
