NSW

## Royal Prince Alfred Hospital: Emergency department (ED) overview

April to June 2017

	last year	one year ago
All presentations: 18,644 patients	18,443	1.1%
Emergency presentations: <sup>2</sup> 18,115 patients	17,907	1.2%

#### Royal Prince Alfred Hospital: Time patients waited to start treatment<sup>3</sup>

April to June 2017

	last year	(this period)
Triage 2 Emergency (e.g. chest pain, severe burns): 2,910 patients	2,625	
Median time to start treatment <sup>4</sup>	10 minutes	8 minutes
90th percentile time to start treatment <sup>5</sup> 24 minutes	23 minutes	26 minutes
Triage 3 Urgent (e.g. moderate blood loss, dehydration): 9,887 patients	9,243	
Median time to start treatment <sup>4</sup> 26 minutes	23 minutes	20 minutes
90th percentile time to start treatment <sup>5</sup> 83 minutes	71 minutes	67 minutes
Triage 4 Semi-urgent (e.g. sprained ankle, earache): 4,703 patients	5,335	
Median time to start treatment <sup>4</sup> 31 minutes	28 minutes	25 minutes
90th percentile time to start treatment <sup>5</sup>	104 minutes	99 minutes
Triage 5 Non-urgent (e.g. small cuts or abrasions): 497 patients	577	
Median time to start treatment <sup>4</sup> 30 minutes	34 minutes	23 minutes
90th percentile time to start treatment <sup>5</sup>	133 minutes	101 minutes

## **Royal Prince Alfred Hospital:** Time from presentation until leaving the ED April to June 2017

Attendances used to calculate time to leaving the ED:6 18,643 patients

Percentage of patients who spent	
four hours or less in the ED	63.4%

Change since	Same period
one year ago	last year
1.1%	18,443
	58.6%

Same period Change since

Same period

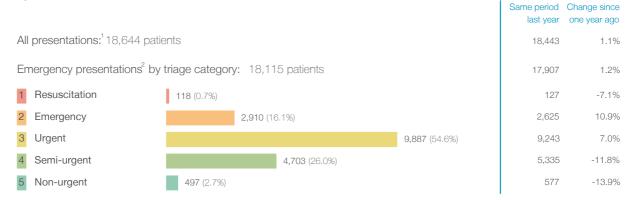

- \* Suppressed due to small number of patients and to protect privacy. Relevant graphs are also suppressed.
- 1. All emergency and non-emergency attendances at the emergency department (ED).
- 2. All attendances that have a triage category and are coded as emergency presentations or unplanned return visits.
- 3. Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016.*
- 4. The median is the time by which half of patients started treatment. The other half of patients waited equal to or longer than this time.
- 5. The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients waited equal to or longer than this time.
- 6. All presentations that have a departure time.

Note: Presentation time is the earlier time recorded for clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care relevant to the patient's presenting problems.

Percentage of patients who spent four hours or less in the ED, by quarter, April 2012 to June 2017 11

- \* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.
- † Data points are not shown in graphs for quarters when patient numbers were too small.
- 1. All emergency and non-emergency presentations at the emergency department (ED).
- 2. All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- 3. Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016.*
- 4. The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- 5. The 90th percentile is the time by which 90% of patients started treatment. The final 105% of patients took equal to or longer than this time.
- 6. All presentations that have a departure time.
- 7. Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department.
- 8. The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- 9. The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

Note: Presentation time is the earlier of times recorded for the start of clerical registration or the triage process.

Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

Note: All percentages are rounded and therefore percentages may not add to 100%.
