Bankstown / Lidcombe Hospital: Emergency department (ED) overview October to December 2017

		Change since one year ago
All presentations:1 13,745 patients	13,519	1.7%
Emergency presentations: ² 13,661 patients	13,392	2.0%

Bankstown / Lidcombe Hospital: Time patients waited to start treatment ^a

October to December 2017		
	Same period last year	NSW (this period)
Triage 2 Emergency (e.g. chest pain, severe burns): 2,518 patients	2,521	
Median time to start treatment ⁴	9 minutes	8 minutes
90th percentile time to start treatment ⁵ 29 minutes	27 minutes	23 minutes
Triage 3 Urgent (e.g. moderate blood loss, dehydration): 6,397 patients	5,764	00 minutes
	23 minutes	20 minutes
90th percentile time to start treatment ⁵	73 minutes	65 minutes
Triage 4 Semi-urgent (e.g. sprained ankle, earache): 4,095 patients	4,351	
Median time to start treatment ⁴	23 minutes	26 minutes
90th percentile time to start treatment ⁵	80 minutes	99 minutes
Triage 5 Non-urgent (e.g. small cuts or abrasions): 548 patients	653	
Median time to start treatment ⁴ 29 minutes	18 minutes	23 minutes
90th percentile time to start treatment ⁵	65 minutes	103 minutes

Bankstown / Lidcombe Hospital: Time from presentation until leaving the ED

October to December 2017			Same period last year	Change since one year ago
Attendances used to calculate time to le	eaving the ED: 6 13,745 patients		13,519	1.7%
Percentage of patients who spent four hours or less in the ED		73.5%	78.5%	

* Suppressed due to small number of patients and to protect privacy. Relevant graphs are also suppressed.

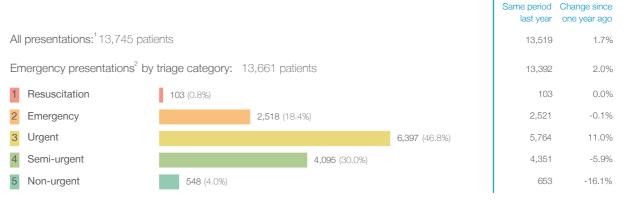

- 1. All emergency and non-emergency attendances at the emergency department (ED).
- 2. All attendances that have a triage category and are coded as emergency presentations or unplanned return visits.
- 3. Some patients are excluded from ED time measures due to calculation requirements. For details, see the
- Technical Supplement: Emergency department measures, July to September 2016.4. The median is the time by which half of patients started treatment. The other half of patients waited equal to or longer than this time.
- 5. The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients waited equal to or longer than this time.
- 6. All presentations that have a departure time.

Note: Presentation time is the earlier time recorded for clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care relevant to the patient<s presenting problems.

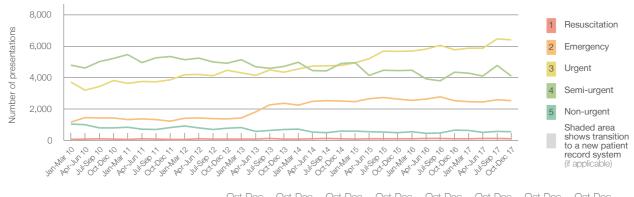

Source: Health Information Exchange, NSW Health (extracted 23 January 2018).

^(†) Data points are not shown in graphs for quarters when patient numbers are too small.

Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after (\pm) transition to a new information system is not directly comparable. For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to December 2017 ^{†*}

- * Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.
- † Data points are not shown in graphs for quarters when patient numbers were too small.
- * Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see
- Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.
- 1. All emergency and non-emergency presentations at the emergency department (ED).
- 2. All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- 3. Some patients are excluded from ED time measures due to calculation requirements. For details, see the Technical Supplement: Emergency department measures, July to September 2016.
- 4. The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- 5. The 90th percentile is the time by which 90% of patients started treatment. The final105% of patients took equal to or longer than this time.
- 6. All presentations that have a departure time.
- 7. Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department.
- 8. The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- 9. The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.
- Note: Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient<s presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.
 Note: All percentages are roughed and therefore percentages may not add to 100%.
