> Performance Profile: Broken Hill Region facility group

### Introduction

The Bureau of Health Information has produced a Performance Profile for each Local Health District (LHD) and facility group included in its report *Patient Perspectives: Mental health services in NSW public facilities, Volume 2, Community Mental Health.* 

This profile report offers a detailed snapshot of the performance of Broken Hill Region facility group community mental health services. It is based upon 34 responses to the *NSW Health Patient Survey*, made by people accessing services in February 2010 and February 2011.

Due to small sample sizes, survey results for some individual community mental health facilities were grouped together for reporting purposes. We report at these group levels.\*

The profile builds on the main report, providing another layer of detail about local performance of Broken Hill Region facility group. This profile includes survey results for:

- aspects of care scores relative to other facilities and NSW average
- the three highest and lowest ranking questions
- overall ratings of care
- demographic information about respondents.

The main report contains information on a state level, including:

- An overall account of how community mental health services are perceived and rated by users of the services
- How the ratings and perceptions about community mental health services differ from those given by other patient groups
- The extent of variation in ratings and perceptions within the state at regional and local level
- The highest rated aspect of care for community mental health services
- The lowest rated aspect of care for community mental health services
- Differences between population subgroups, for example whether perceptions and ratings of care differ between Aboriginal and non-Aboriginal people
- A comparison with other jurisdictions undertaking similar surveys to place NSW results in a broader context.

The main report and the associated Patient Perspectives Technical Supplement: Mental health services in NSW public facilities, February 2010 and February 2011 are available at www.bhi.nsw.gov.au

(\*) Included in Broken Hill Region facility group: Broken Hill Child & Adolescent Service, Broken Hill Mental Health and Counselling Team, Broken Hill Transition Support, Lower Southern Sector Mental Health & Counselling Team.

# **Broken Hill Region:** performance profile NSW Community Mental Health Survey

Survey questions were grouped into themed categories, called aspects of care and allocated a score. These scores were used to directly compare relative performance.

This graph shows for each aspect of care:

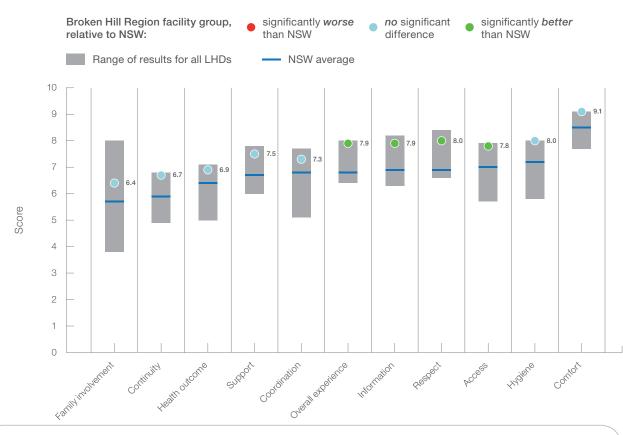

- scores for Broken Hill Region facility group (shown as a dot)
- state average (shown as a blue line) and,
- the range of scores achieved across all NSW facility groups (shown as a grey block).

Within each aspect of care, those facility groups positioned towards the top of the range are performing well relative to other facility groups. Those located at the bottom are doing less well.

The graph also illustrates results of significance testing for Broken Hill Region facility group compared to the NSW average.

As a guide, green dots indicate results that are significantly higher than the state average, while red dots represent a facility group is significantly lower than NSW.

# Figure 1: **Broken Hill Region facility group** Aspects of care scores relative to other facilities and NSW average

Note: Results for facility groups with a response rate of <20%, are suppressed. For fuller definition and description of aspects of care, see Patient Perspectives: Mental health services in NSW public facilities, Volume 2, Community Mental Health.</li>
