

Gunnedah District Hospital: Emergency department (ED) overview

July to September 2017

All presentations:¹ 2,457 patients
Emergency presentations:² 2,398 patients

Same period last year	Change since one year ago
1,950	26.0%
1,825	31.4%

Gunnedah District Hospital: Time patients waited to start treatment³

July to September 2017

Triage 2 Emergency (e.g. chest pain, severe burns): 142 patients

Median time to start treatment⁴ 5 minutes
90th percentile time to start treatment⁵ 25 minutes

Triage 3 Urgent (e.g. moderate blood loss, dehydration): 466 patients

Median time to start treatment⁴ 18 minutes
90th percentile time to start treatment⁵ 76 minutes

Triage 4 Semi-urgent (e.g. sprained ankle, earache): 1,309 patients

Median time to start treatment⁴ 35 minutes
90th percentile time to start treatment⁵ 134 minutes

Triage 5 Non-urgent (e.g. small cuts or abrasions): 481 patients

Median time to start treatment⁴ 27 minutes
90th percentile time to start treatment⁵ 125 minutes

Same period last year	NSW (this period)

Gunnedah District Hospital: Time from presentation until leaving the ED

July to September 2017

Attendances used to calculate time to leaving the ED:⁶ 2,457 patients

Percentage of patients who spent four hours or less in the ED 87.2%

Same period last year	Change since one year ago
1,950	26.0%
88.6%	

* Suppressed due to small number of patients and to protect privacy. Relevant graphs are also suppressed.

- All emergency and non-emergency attendances at the emergency department (ED).
- All attendances that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients waited equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients waited equal to or longer than this time.
- All presentations that have a departure time.

Note: Presentation time is the earlier time recorded for clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care relevant to the patient's presenting problems.

Source: Health Information Exchange, NSW Health (extracted 17 October 2017).

Gunnedah District Hospital: Patients presenting to the emergency department July to September 2017

All presentations:¹ 2,457 patients

Emergency presentations² by triage category: 2,398 patients

Emergency presentations² by quarter, July 2012 to September 2017 †

	Jul-Sep 2012	Jul-Sep 2013	Jul-Sep 2014	Jul-Sep 2015	Jul-Sep 2016	Jul-Sep 2017
Resuscitation	< 5	< 5	< 5	6	5	< 5
Emergency	61	54	99	143	94	142
Urgent	376	373	358	479	445	466
Semi-urgent	1,607	1,523	1,619	1,157	1,132	1,309
Non-urgent	264	433	181	269	149	481
All emergency presentations	2,308	2,383	2,257	2,054	1,825	2,398

Gunnedah District Hospital: Patients arriving by ambulance July to September 2017

Arrivals used to calculate transfer of care time:⁷ 164 patients **

ED Transfer of care time

(†) Data points are not shown in graphs for quarters when patient numbers are too small.

(‡) Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

(**) Interpret with caution: total ambulance arrivals include more than 30% of records for which transfer of care time cannot be calculated.

Gunnedah District Hospital: Time patients waited to start treatment, triage 2 July to September 2017

Gunnedah District Hospital: Time spent in the ED

Percentage of patients who spent four hours or less in the ED

July to September 2017

All presentations at the emergency department:¹ 2,457 patients

Presentations used to calculate time to leaving the ED:⁶ 2,457 patients

Percentage of patients who spent four hours or less in the ED

	Same period last year	Change since one year ago
All presentations at the emergency department: ¹	1,950	26.0%
Presentations used to calculate time to leaving the ED: ⁶	1,950	26.0%
Percentage of patients who spent four hours or less in the ED	88.6%	

Percentage of patients who spent four hours or less in the ED, by quarter, July 2012 to September 2017**

Patients who left within four hours (%)	Jul-Sep 2012	Jul-Sep 2013	Jul-Sep 2014	Jul-Sep 2015	Jul-Sep 2016	Jul-Sep 2017
	93.9%	93.8%	91.0%	89.0%	88.6%	87.2%

* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.

† Data points are not shown in graphs for quarters when patient numbers were too small.

‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

Note: Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

Note: All percentages are rounded and therefore percentages may not add to 100%.
