## Healthcare Quarterly

## Performance Profiles

## Emergency Department

Sydney Children's Hospitals Network

Sydney Children's Hospital, Randwick: Emergency department (ED) overview January to March 2018

All presentations: ${ }^{1}$ 8,542 patients
Emergency presentations: ${ }^{2}$ 8,447 patients

| Same period | Change since |
| ---: | ---: |
| last year | one year ago |
| 9,098 | $-6 \%$ |
| 9,026 | $-6 \%$ |

Sydney Children's Hospital, Randwick: Time patients waited to start treatment ${ }^{3}$ January to March 2018

| Triage 2 Emergency (e.g. chest pain, severe burns): 430 patients |
| :--- |
| Median time to start treatment ${ }^{4}$ |
| 90th percentile time to start treatment ${ }^{5}$ |
| minutes |
| Triage 3 Urgent (e.g. moderate blood loss, dehydration): 1,860 patients |
| Median time to start treatment ${ }^{4}$ |
| 90th percentile time to start treatment ${ }^{5}$ |

Triage 4 Semi-urgent (e.g. sprained ankle, earache): 5,990 patients
Median time to start treatment ${ }^{4}$
90th percentile time to start treatment ${ }^{5}$ 39 minutes
9

Triage 5 Non-urgent (e.g. small cuts or abrasions): 116 patients
Median time to start treatment ${ }^{4}$

38 minutes 22 minutes

118 minutes 97 minutes

Sydney Children's Hospital, Randwick: Time from presentation until leaving the ED January to March 2018

Attendances used to calculate time to leaving the ED: ${ }^{6}$ 8,541 patients
Percentage of patients who spent four hours or less in the ED
 75\%

Same period Change since last year one year ago

9,097 $-6 \%$

* Suppressed due to small number of patients and to protect privacy. Relevant graphs are also suppressed.

1. All emergency and non-emergency attendances at the emergency department (ED).
2. All attendances that have a triage category and are coded as emergency presentations or unplanned return visits.
3. Some patients are excluded from ED time measures due to calculation requirements. For details, see the Technical Supplement: Emergency department measures, January to March 2018.
4. The median is the time by which half of patients started treatment. The other half of patients waited equal to or longer than this time.
5. The 90th percentile is the time by which $90 \%$ of patients started treatment. The final $10 \%$ of patients waited equal to or longer than this time.
6. All presentations that have a departure time.

Note: Presentation time is the earlier time recorded for clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care relevant to the patient<s presenting problems.
Source: Health Information Exchange, NSW Health (extracted 17 April 2018).

Sydney Children's Hospital, Randwick: Patients presenting to the emergency department January to March 2018

[^2]Sydney Children's Hospital, Randwick: Time spent in the ED
Percentage of patients who spent four hours or less in the ED January to March 2018

All presentations at the emergency department: ${ }^{1}$ 8,542 patients
Presentations used to calculate time to leaving the ED: ${ }^{6} 8,541$ patients
Percentage of patients who spent
four hours or less in the ED

$\left.\begin{array}{rr}\text { Same period } & \begin{array}{r}\text { Change since } \\ \text { last year }\end{array} \\ \text { one year ago }\end{array}\right\}$

Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to March $2018{ }^{\text {t }}$

* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.
$\dagger$ Data points are not shown in graphs for quarters when patient numbers were too small.
$\ddagger$ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

1. All emergency and non-emergency presentations at the emergency department (ED).
2. All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
3. Some patients are excluded from ED time measures due to calculation requirements. For details, see the Technical Supplement: Emergency department measures, January to March 2018.
4. The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
5. The 90th percentile is the time by which $90 \%$ of patients started treatment. The final105\% of patients took equal to or longer than this time.
6. All presentations that have a departure time.
7. Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department.
8. The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
9. The 90th percentile is the time by which $90 \%$ of patients left the ED. The final $10 \%$ of patients took equal to or longer than this time.
Note: Presentation time is the earlier of times recorded for the start of clerical registration or the triage process.
Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient<s presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.
Note: All percentages are rounded and therefore percentages may not add to 100\%.
Sources: ED data from Health Information Exchange, NSW Health (extracted 17 April 2018).
Transfer of care data from Transfer of Care Reporting System (extracted 17 April 2018).

Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to March $2018{ }^{\dagger \ddagger}$

* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.
$\dagger$ Data points are not shown in graphs for quarters when patient numbers were too small.
$\ddagger$ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

1. All emergency and non-emergency presentations at the emergency department (ED).
2. All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
3. Some patients are excluded from ED time measures due to calculation requirements. For details, see the Technical Supplement: Emergency department measures, January to March 2018.
4. The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
5. The 90th percentile is the time by which $90 \%$ of patients started treatment. The final105\% of patients took equal to or longer than this time.
6. All presentations that have a departure time.
7. Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department.
8. The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
9. The 90th percentile is the time by which $90 \%$ of patients left the ED. The final $10 \%$ of patients took equal to or longer than this time.
Note: Presentation time is the earlier of times recorded for the start of clerical registration or the triage process.
Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient<s presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.
Note: All percentages are rounded and therefore percentages may not add to 100\%.
Sources: ED data from Health Information Exchange, NSW Health (extracted 17 April 2018).
Transfer of care data from Transfer of Care Reporting System (extracted 17 April 2018).
