Gosford Hospital: Emergency department (ED) overview

July to September 2018

All presentations:¹ 17,173 patients

Emergency presentations:² 17,101 patients

Same period last year	Change since one year ago
17,739	-3%
17,623	-3%

Gosford Hospital: Time patients waited to start treatment³

July to September 2018

Triage 2 Emergency (e.g. chest pain, severe burns): 2,400 patients

Median time to start treatment⁴ 7 minutes

90th percentile time to start treatment⁵ 20 minutes

Triage 3 Urgent (e.g. moderate blood loss, dehydration): 7,171 patients

Median time to start treatment⁴ 25 minutes

90th percentile time to start treatment⁵ 89 minutes

Triage 4 Semi-urgent (e.g. sprained ankle, earache): 6,889 patients

Median time to start treatment⁴ 38 minutes

90th percentile time to start treatment⁵ 120 minutes

Triage 5 Non-urgent (e.g. small cuts or abrasions): 440 patients

Median time to start treatment⁴ 34 minutes

90th percentile time to start treatment⁵ 110 minutes

Gosford Hospital: Time from presentation until leaving the ED

July to September 2018

Attendances used to calculate time to leaving the ED:⁶ 17,173 patients

Percentage of patients who spent four hours or less in the ED 59%

Same period last year	Change since one year ago
17,739	-3%
63%	

* Suppressed due to small number of patients and to protect privacy. Relevant graphs are also suppressed.

- All emergency and non-emergency attendances at the emergency department (ED).
- All attendances that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, January to March 2018*.
- The median is the time by which half of patients started treatment. The other half of patients waited equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients waited equal to or longer than this time.
- All presentations that have a departure time.

Note: Presentation time is the earlier time recorded for clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care relevant to the patient's presenting problems.

Gosford Hospital: Time spent in the ED
 Percentage of patients who spent four hours or less in the ED
 July to September 2018

All presentations at the emergency department: ¹ 17,173 patients

Presentations used to calculate time to leaving the ED: ⁶ 17,173 patients

Percentage of patients who spent four hours or less in the ED

Same period last year	Change since one year ago
17,739	-3%
17,739	-3%
63.1%	

Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to September 2018 ^{†‡}

* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.

† Data points are not shown in graphs for quarters when patient numbers were too small.

‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, January to March 2018*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

Note: Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

Note: All percentages are rounded and therefore percentages may not add to 100%.

Sources: ED data from Health Information Exchange, NSW Health (extracted 16 October 2018). Transfer of care data from Transfer of Care Reporting System (extracted 16 October 2018).

21 minutes	22 minutes
81 minutes	103 minutes

Percentage of triage 5 patients who received treatment by time, July to September 2018

Time patients waited to start treatment (minutes) for triage 5 patients, January 2010 to September 2018^{†‡}

	Jul-Sep 2010	Jul-Sep 2011	Jul-Sep 2012	Jul-Sep 2013	Jul-Sep 2014	Jul-Sep 2015	Jul-Sep 2016	Jul-Sep 2017	Jul-Sep 2018
Median time to start treatment ⁴ (minutes)	58		31	33	31	25	20	21	18
90th percentile time to start treatment ⁵ (minutes)	177		113	105	100	79	70	81	71

(†) Data points are not shown in graphs for quarters when patient numbers are too small.

(‡) Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

Wyong Hospital: Time patients spent in the ED

July to September 2018

All presentations:¹ 16,893 patients

Presentations used to calculate time to leaving the ED:⁶ 16,893 patients

Median time spent in the ED⁸ 3 hours and 5 minutes

90th percentile time spent in the ED⁹ 7 hours and 25 minutes

Same period last year	NSW (this period)
17,444	17,444
2 hours and 48 minutes	2 hours and 52 minutes
7 hours and 23 minutes	7 hours and 30 minutes

Percentage of patients who left the ED by time, July to September 2018

Time patients spent in the ED, by quarter, January 2010 to September 2018^{†‡}

(†) Data points are not shown in graphs for quarters when patient numbers are too small.

(‡) Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

Wyong Hospital: Time patients spent in the ED
By mode of separation
July to September 2018

All presentations:¹ 16,893 patients

Presentations used to calculate time to leaving the ED:⁶ 16,893 patients

Treated and discharged	11,347 (67.2%)
Treated and admitted to hospital	4,251 (25.2%)
Patient left without, or before completing, treatment	634 (3.8%)
Transferred to another hospital	623 (3.7%)
Other	38 (0.2%)

Same period last year	Change since one year ago
17,444	-3%
12,135	-6.5%
4,119	3.2%
547	15.9%
627	-0.6%
16	137.5%

For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

Wyong Hospital: Time spent in the ED
 Percentage of patients who spent four hours or less in the ED
 July to September 2018

All presentations at the emergency department: ¹ 16,893 patients

Presentations used to calculate time to leaving the ED: ⁶ 16,893 patients

Percentage of patients who spent four hours or less in the ED

Same period last year	Change since one year ago
17,444	-3%
17,444	-3%
69.0%	

Percentage of patients who spent four hours or less in the ED, by quarter, January 2010 to September 2018 ^{†‡}

* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.

† Data points are not shown in graphs for quarters when patient numbers were too small.

‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, January to March 2018*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

Note: Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

Note: All percentages are rounded and therefore percentages may not add to 100%.

Sources: ED data from Health Information Exchange, NSW Health (extracted 16 October 2018). Transfer of care data from Transfer of Care Reporting System (extracted 16 October 2018).
