Same period<br/>last yearChange since<br/>one year agoAll attendances:1 4,980 patients5,114-3%Emergency attendances:2 4,359 patients4,2652%

#### Broken Hill Base Hospital: Time from presentation to treatment<sup>3</sup>

January to March 2016 Same period NSW (this period) last year Triage 2 Emergency (e.g. chest pain, severe burns): 349 patients 333 5 minutes Median time to start treatment<sup>4</sup> 9 minutes 8 minutes 25 minutes 95th percentile time to start treatment<sup>5</sup> 33 minutes 35 minutes Triage 3 Urgent (e.g. moderate blood loss, dehydration): 1,074 patients 935 13 minutes Median time to start treatment<sup>4</sup> 21 minutes 20 minutes 53 minutes 95th percentile time to start treatment<sup>5</sup> 80 minutes 99 minutes Triage 4 Semi-urgent (e.g. sprained ankle, earache): 1,597 patients 1.584 15 minutes Median time to start treatment<sup>4</sup> 32 minutes 26 minutes 84 minutes 133 minutes 137 minutes 95th percentile time to start treatment<sup>5</sup> Triage 5 Non-urgent (e.g. small cuts or abrasions): 1,330 patients 1.401 15 minutes Median time to start treatment<sup>4</sup> 23 minutes 36 minutes 84 minutes 135 minutes 95th percentile time to start treatment<sup>6</sup> 154 minutes

#### Broken Hill Base Hospital: Time from presentation until leaving the ED

January to March 2016			Same period last year	Change since one year ago
Attendances used to calculate time to	eaving the ED:6 4,980 patients		5,114	-3%
Percentage of patients who left the ED within four hours		90%	85%	

\* Suppressed due to small number of patients and to protect privacy. Relevant graphs are also suppressed.

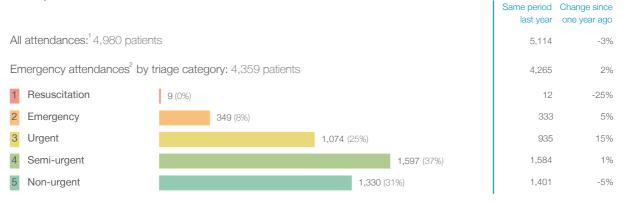

- 1. All emergency and non-emergency attendances at the emergency department (ED).
- 2. All attendances that have a triage category and are coded as emergency presentations or unplanned return visits.
- 3. Some patients are excluded from ED time measures due to calculation requirements. For details, see the
- Technical Supplement: Emergency department measures, January to March 2016.4. The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 95th percentile is the time by which 95% of patients started treatment. The final 5% of patients took equal to or longer than this time.
- 6. All attendances that have a departure time.

Note: Presentation time is the earlier time recorded for clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care relevant to the patient's presenting problems.

11 minutes

32 minutes

Same period<br/>last yearChange since<br/>one year ago63314 minutes53 minutes-21 minutes

(†) Data points are not shown in graphs for quarters when patient numbers are too small.

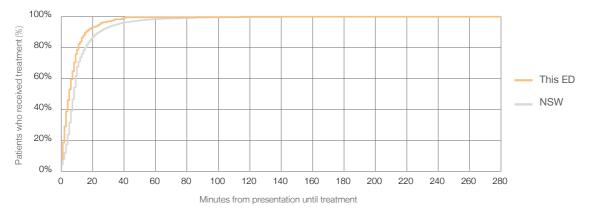

(‡) Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

(§) For some smaller NSW hospitals, transfer of care times reported in Hospital Quarterly are being assessed for data quality and results should be interpreted with caution.

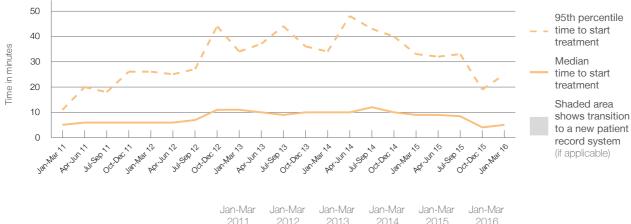

**Broken Hill Base Hospital:** Time from presentation to treatment, triage 2 January to March 2016

#### Percentage of patients who left the ED within four hours of presentation, by quarter, January 2011 to March 2016<sup>†‡</sup>

- \* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.
- † Data points are not shown in graphs for quarters when patient numbers were too small.
- Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.
- All emergency and non-emergency attendances at the emergency department (ED).
- All attendances that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the
- So the patients are excluded from ED time measures due to calculation requirements. For C Technical Supplement: Emergency department measures, January to March 2016.
   The relation is the time build be for activate structure to the technology of activate the technology.
- 4. The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- 5. The 95th percentile is the time by which 95% of patients started treatment. The final 5% of patients took equal to or longer than this time.
- 6. All attendances that have a departure time.
- 7. Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department.
- 8. The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- 9. The 95th percentile is the time by which 95% of patients left the ED. The final 5% of patients took equal to or longer than this time.
- Note: Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.
   Note: All percentages rounded to whole numbers and therefore percentages may not add to 100%.
