Royal Prince Alfred Hospital: Emergency department (ED) overview July to September 2016

| | last year | one year ago |
|---|-----------|--------------|
| All presentations: 1 18,419 patients | 18,190 | 1.3% |
| Emergency presentations: ² 17,889 patients | 17,670 | 1.2% |

Royal Prince Alfred Hospital: Time patients waited to start treatment ³

July to September 2016

| | last year | (this period) |
|---|-------------|---------------|
| Triage 2 Emergency (e.g. chest pain, severe burns): 2,744 patients | 3,301 | |
| Median time to start treatment ⁴ | 13 minutes | 8 minutes |
| 95th percentile time to start treatment 5 31 minutes | 41 minutes | 41 minutes |
| | | |
| Triage 3 Urgent (e.g. moderate blood loss, dehydration): 9,519 patients | 8,167 | |
| Median time to start treatment ⁴ 24 minutes | 27 minutes | 21 minutes |
| 95th percentile time to start treatment ⁵ 101 minutes | 117 minutes | 103 minutes |
| Triage 4 Semi-urgent (e.g. sprained ankle, earache): 5,010 patients | 5,280 | |
| | 0,200 | |
| Median time to start treatment ⁴ 32 minutes | 34 minutes | 27 minutes |
| 95th percentile time to start treatment ⁵ | 157 minutes | 139 minutes |
| Triage 5 Non-urgent (e.g. small cuts or abrasions): 490 patients | 820 | |
| Od animaton | 40 | 04 |
| iviedian time to start treatment | 43 minutes | 24 minutes |
| 95th percentile time to start treatment ⁵ | 170 minutes | 138 minutes |

Royal Prince Alfred Hospital: Time from presentation until leaving the ED

July to September 2016

Attendances used to calculate time to leaving the ED: 6 18,419 patients

| Percentage of patients who spent | |
|-----------------------------------|--------|
| i crocinage of patients who spent | OF 00/ |
| four hours or less in the ED | 65.2% |
| 1041 110410 01 1000 11 110 22 | |

| | Change since one year ago |
|--------|---------------------------|
| 18,190 | 1.3% |
| 61.9% | |

Same period Change since

Same period

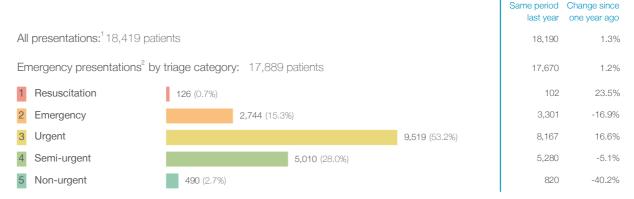

- * Suppressed due to small number of patients and to protect privacy. Relevant graphs are also suppressed.
- 1. All emergency and non-emergency attendances at the emergency department (ED).
- 2. All attendances that have a triage category and are coded as emergency presentations or unplanned return visits.
- 3. Some patients are excluded from ED time measures due to calculation requirements. For details, see the Technical Supplement: Emergency department measures, July to September 2016.
- 4. The median is the time by which half of patients started treatment. The other half of patients waited equal to or longer than this time.
- 5. The 95th percentile is the time by which 95% of patients started treatment. The final 5% of patients waited equal to or longer than this time.
- 6. All presentations that have a departure time.

Note: Presentation time is the earlier time recorded for clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care relevant to the patient<s presenting problems.

Royal Prince Alfred Hospital: Time spent in the ED Percentage of patients who spent four hours or less in the ED July to September 2016

All presentations at the emergency department: 118,419 patients

Presentations used to calculate time to leaving the ED: 6 18,419 patients

Percentage of patients who spent four hours or less in the ED 65.2%

| Change since one year ago | |
|---------------------------|--------|
| 1.3% | 18,190 |
| 1.3% | 18,190 |
| | 61.9% |

Percentage of patients who spent four hours or less in the ED, by quarter, July 2011 to September 2016 †*

- * Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.
- † Data points are not shown in graphs for quarters when patient numbers were too small.
- 1. All emergency and non-emergency presentations at the emergency department (ED).
- 2. All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- 3. Some patients are excluded from ED time measures due to calculation requirements. For details, see the Technical Supplement: Emergency department measures, July to September 2016.
- 4. The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- 5. The 95th percentile is the time by which 95% of patients started treatment. The final 5% of patients took equal to or longer than this time.
- 6. All presentations that have a departure time.
- 7. Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department.
- 8. The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- 9. The 95th percentile is the time by which 95% of patients left the ED. The final 5% of patients took equal to or longer than this time.

Note: Presentation time is the earlier of times recorded for the start of clerical registration or the triage process.

Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient<s presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

Note: All percentages are rounded and therefore percentages may not add to 100%.
