\*\* These data are not reported due to a policy change in the definition of patient stay types. A new mental health care stay type has been introduced that comprises patients who were previously included in the acute and non-acute stay types that are routinely reported by BHI. Acute, non-acute and mental health stay types will be reported separately in the next edition of Healthcare Quarterly, which covers January to March 2018.

<sup>1</sup> The decrease in the percentage of patients treated and admitted to hospital from the ED may reflect changes in data coding practices. Changes will be reflected in the January to March 2018 edition of *Healthcare Quarterly*
