

Action

Deleted '(other than common side-effects from treatment)' from the question.

Added response option:

- Lymphoedema (chronic excessive swelling)

Rationale

This response option was added at the request of one of the survey's stakeholders. BHI agreed as it was hoped that addition of 'Lymphoedema' would reduce the percentage of respondents selecting the non-specific response option 'Any other complication or problem' (2.6% in 2016) and/or the 'missing' response rates (4.3% in 2016).

Question 59. (previous Q60)

What type of cancer were you receiving care for at this clinic? Please x one box only

- Prostate
- Breast
- Bowel (colon, rectal, anus)
- Lung
- Skin/melanoma
- Upper gastrointestinal (oesophagus, stomach, liver, pancreatic, bile ducts)
- Gynaecological (e.g. ovarian, endometrial, cervical)
- Brain or spinal column
- Head and neck
- Blood (lymphoma, leukaemia, marrow, lymph nodes etc.)
- Other (bone, mesothelioma, thyroid etc.)

Deleted 'e.g.', 'bladder', 'eye', 'heart' and 'kidney' from response option 'Other'. Added 'etc.' to response options 'Blood' and 'Other'.

Rationale

To specify that the response options 'blood' and 'other' list a few examples but the lists are not complete.

Question 62. (previous Q63) How long has it been since you first received treatment for this cancer?

- Less than 3 months
- 3 to 6 months
- More than 6 months but less than 1 year
- 1 to 5 years
- More than 5 years
- Don't know/can't remember
- I have not received any treatment

Additional response option

- I have not received any treatment

Rationale

The filter from the response option ('*I am not in active treatment but I am on "Watch and Wait"*') to question 61 was changed. These respondents also now answer Q62. It is possible that the 'Watch and Wait' respondents have not received any treatment which is why this was added as a response option to Q62.
