

Royal Prince Alfred Hospital Sydney LHD

This profile presents selected results from the Outpatient Cancer Clinics Survey for patients seen during February and March 2015. Patients were identified for inclusion if they attended an outpatient cancer clinic at a participating NSW public hospital or the Chris O'Brien Lifehouse. Across NSW, more than 3,500 patients attending outpatient cancer clinics responded to the survey – a response rate of 57.3%. There were 64 responses from Royal Prince Alfred Hospital – a response rate of 40%.

Overall, how would you rate the care you received in the clinic?

Complications

- - Did not go to an emergency department because of cancer or cancer complications in the past three months
 - 2. Did not experience any complication related to care received at the clinic

2. 'Always' treated with respect and dignity

or treatment

1. Cultural or religious beliefs were 'always' respected

3. Health professionals were 'always' kind and caring

6. Reception staff were 'definitely' polite and courteous

4. 'Definitely' given enough privacy when being examined or treated

5. 'Definitely' given enough privacy when discussing condition

Note: This hospital has too few respondents in active treatment for individual reporting

* Significant differences are when 95% confidence intervals do not overlap.

1. Communication and Attitudinal Self-Efficacy Scale (CASE-Cancer). Wolf MS et al, 2005. CASE-Cancer scores were generated by scoring the four response options and averaging at the domain level for hospital and NSW.

2. Edmonton Symptom Assessment System (ESAS). Bruera E, et al, 1991. ESAS scores are average values for each symptom.
