

Armidale and New England Hospital: Emergency department (ED) overview

April to June 2017

All presentations:¹ 3,923 patients
Emergency presentations:² 3,774 patients

Same period last year	Change since one year ago
4,016	-2.3%
3,849	-1.9%

Armidale and New England Hospital: Time patients waited to start treatment³

April to June 2017

Triage 2 Emergency (e.g. chest pain, severe burns): 251 patients

Median time to start treatment⁴ 9 minutes
90th percentile time to start treatment⁵ 40 minutes

Triage 3 Urgent (e.g. moderate blood loss, dehydration): 1,065 patients

Median time to start treatment⁴ 27 minutes
90th percentile time to start treatment⁵ 90 minutes

Triage 4 Semi-urgent (e.g. sprained ankle, earache): 2,137 patients

Median time to start treatment⁴ 38 minutes
90th percentile time to start treatment⁵ 147 minutes

Triage 5 Non-urgent (e.g. small cuts or abrasions): 308 patients

Median time to start treatment⁴ 25 minutes
90th percentile time to start treatment⁵ 112 minutes

Armidale and New England Hospital: Time from presentation until leaving the ED

April to June 2017

Attendances used to calculate time to leaving the ED:⁶ 3,923 patients

Percentage of patients who spent four hours or less in the ED 78.4%

Same period last year	Change since one year ago
4,016	-2.3%
83.6%	

* Suppressed due to small number of patients and to protect privacy. Relevant graphs are also suppressed.

- All emergency and non-emergency attendances at the emergency department (ED).
- All attendances that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients waited equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients waited equal to or longer than this time.
- All presentations that have a departure time.

Note: Presentation time is the earlier time recorded for clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care relevant to the patient's presenting problems.

Source: Health Information Exchange, NSW Health (extracted 21 July 2017).

Armidale and New England Hospital: Patients presenting to the emergency department

April to June 2017

All presentations:¹ 3,923 patients

Emergency presentations² by triage category: 3,774 patients

	Same period last year	Change since one year ago
All presentations	4,016	-2.3%
Emergency presentations	3,849	-1.9%
Resuscitation	8	62.5%
Emergency	249	0.8%
Urgent	1,187	-10.3%
Semi-urgent	2,156	-0.9%
Non-urgent	249	23.7%

Emergency presentations² by quarter, April 2012 to June 2017 †

	Apr-Jun 2010	Apr-Jun 2011	Apr-Jun 2012	Apr-Jun 2013	Apr-Jun 2014	Apr-Jun 2015	Apr-Jun 2016	Apr-Jun 2017

Armidale and New England Hospital: Patients arriving by ambulance

April to June 2017

Arrivals used to calculate transfer of care time:⁷ 436 patients **

ED Transfer of care time

	Same period last year	Change since one year ago
Arrivals used to calculate transfer of care time	400	
Median time	4 minutes	0 minutes
90th percentile time	26 minutes	3 minutes

(†) Data points are not shown in graphs for quarters when patient numbers are too small.

(‡) Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

(**) Interpret with caution: total ambulance arrivals include more than 30% of records for which transfer of care time cannot be calculated.

Armidale and New England Hospital: Time patients waited to start treatment, triage 2

For more information, see Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.

Armidale and New England Hospital: Time spent in the ED
Percentage of patients who spent four hours or less in the ED
 April to June 2017

All presentations at the emergency department:¹ 3,923 patients

Presentations used to calculate time to leaving the ED:⁶ 3,923 patients

Percentage of patients who spent four hours or less in the ED

	Same period last year	Change since one year ago
All presentations at the emergency department: ¹ 3,923 patients	4,016	-2.3%
Presentations used to calculate time to leaving the ED: ⁶ 3,923 patients	4,016	-2.3%
Percentage of patients who spent four hours or less in the ED	83.6%	

Percentage of patients who spent four hours or less in the ED, by quarter, April 2012 to June 2017^{†‡}

* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.

† Data points are not shown in graphs for quarters when patient numbers were too small.

‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, July to September 2016*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

Note: Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

Note: All percentages are rounded and therefore percentages may not add to 100%.
