

# Errata

## Hospital Quarterly: Activity and performance in NSW public hospitals, July to September 2014 (Volume 5, Issue3)

In February 2015 errors were identified in the report *Hospital Quarterly: Activity and performance in NSW public hospitals July to September 2014*.

On page 8 of the report, dot point two of column two incorrectly stated:

*'Compared to the same quarter last year, 62 out of 84 NSW hospitals (74%) improved on the median waiting time for elective surgery.'*

This text should have stated:

*'Compared to the same quarter last year, 29 out of 83 NSW hospitals (35%) improved on the proportion of elective surgery completed on time.'*

On page 39 of the report, the first sentence of paragraph one incorrectly stated:

*'Compared to the same quarter last year, the median waiting time for non-urgent and semi-urgent elective surgery increased by one day and 44 days respectively, while the median waiting time for urgent elective surgery remained unchanged at 10 days (Figure 32).'*

This text should have stated:

*'Compared to the same quarter last year, the median waiting time for non-urgent and semi-urgent elective surgery both increased by one day, while the median waiting time for urgent elective surgery remained unchanged at 10 days (Figure 32).'*

On page 35 of the report a minor typo was identified in the first sentence of column two, paragraph two. The year in the following text was updated from '2012' to '2013':

*'Figure 29 presents the percentage of patients leaving the ED within four hours alongside the percentage change since the same quarter in 2013.'*

These corrections were made and a new version of the report uploaded to the BHI website on 20 March 2015.
